Rural Utilities Service

Title: Accounting Requirements for RUS Electric and Telecommunications Borrowers.

OMB Control Number: 0572-0003.

Summary of Collection: Rural Utilities Service (RUS) is a credit agency of the U.S. Department of Agriculture that makes loans (direct and guaranteed) to finance electric and telecommunications facilities in rural areas. This collection is primarily a recordkeeping requirement. 7 CFR parts 1767 and 1770 set forth basic accounting requirements for maintaining financial accounting records on an accrual basis that are unique to RUS borrowers. The agency is requiring borrowers to establish an index of records. RUS does not own or operate rural electric facilities. Its function is to provide, through self-liquidating loans and technical assistance, adequate and dependable electric and telecommunications service to rural people under rates and conditions that permit productive use of these utility services. RUS borrowers, as all businesses, need accounting systems for their own internal use as well as external use. Such records are maintained as part of normal business practices. Without systems, no records would exist, for example, or what they own or what they owe. Such records systems provide borrowers with information that is required by the manager and board of directors to operate on a daily basis, to complete their tax returns, and to support requests to state regulatory commissions for rate approvals.

Need and Use of the Information: There are many important financial considerations for the retention and preservation of accounting records. One of the most important considerations to RUS is that documentation be available so that the borrower's records may be audited for proper disbursements of funds. The hours of burden to maintain this index are directly related to those portions of the accounting system that are unique to the Agency. RUS uses the information to evaluate a borrower's financial performance, to determine whether current loans are at risk, and to determine the credit worthiness of future loans. If basic financial records were not maintained, the borrower, its investors, and RUS would be unable to evaluate a borrower's financial performance, to determine whether

current loans are at risk, and to determine the credit worthiness of future loans.
