SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The information collection requirements specified in the Bloodborne Pathogens Standard require

employers to: Develop and maintain exposure control plans; develop a housekeeping schedule; provide workers with HBV vaccinations, as well as post-exposure medical evaluations and follow-ups; provide workers with information and training; maintain medical and training records for specified periods; provide OSHA, the National Institute for Occupational Safety and Health, workers and their authorized representatives with access to these records; establish and maintain a sharps injury log for the recording of percutaneous injuries from contaminated sharps; and HIV and HBV research laboratories and production facilities must also adopt or develop, and review at least once a year, a biosafety manual.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Bloodborne Pathogens Standard (29 CFR 1910.1030). The Agency is requesting an increase in the existing burden hours from 14,059,435 hours to 14,518,737 a total increase of 459,302 hours. The increase is the result of an increase in the number of workers and the number of establishments affected. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Bloodborne Pathogens Standard (29 CFR 1910.1030).

OMB Number: 1218-0180.

Affected Public: Business or other for-profit organizations; not-for-profit institutions; Federal, State, Local, or Tribal Governments.

Number of Respondents: 666,933.

Frequency: On occasion.

Total Responses: 18,589,251.

Average Time per Response: Time per response varies from 5 minutes (.08 hour) to maintain records to 1.5 hours for workers to receive training or medical evaluations.

Estimated Total Burden Hours: 14,518,737.

Estimated Cost (Operation and Maintenance): \$26,030,079.
