

that the inseason action described below is necessary to meet management and conservation goals. This inseason action modifies landing and possession limits, quotas and/or fishing seasons under 50 CFR 660.409(b)(1)(i).

All other restrictions and regulations remain in effect as announced for the 2024–2025 ocean salmon fisheries (89 FR 44553, May 21, 2024; 89 FR 53529, June 27, 2024; 89 FR 61355, July 31, 2024; 89 FR 104895, December 26, 2024; 90 FR 13840, March 27, 2025) except as previously modified by inseason actions.

As provided by the inseason notice procedures at 50 CFR 660.411, actual notice of the described regulatory actions was given, prior to the time the actions became effective, by telephone hotline numbers 206–526–6667 and 800–662–9825, and by U.S. Coast Guard Notice to Mariners broadcasts on Channel 16 VHF–FM and 2182 kHz.

#### Classification

NMFS issues this action pursuant to section 305(d) of the MSA. This action is authorized by 50 CFR 660.409, which was issued pursuant to section 304(b) of the MSA, and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(3)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. Prior notice and opportunity for public comment on this action was impracticable because NMFS had insufficient time to provide for prior notice and the opportunity for public comment between the time Chinook and coho salmon abundance, catch, and effort information were developed and fisheries impacts were calculated, and the time the fishery modifications had to be implemented in order to ensure that fisheries are managed based on the best scientific information available. As previously noted, actual notice of the regulatory action was provided to fishers through telephone hotlines and radio notifications. These actions comply with the requirements of the annual management measures for ocean salmon fisheries (89 FR 44553, May 21, 2024; 89 FR 53529, June 27, 2024), the FMP, and regulations implementing the FMP under 50 CFR 660.409 and 660.411.

There is good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date, as a delay in effectiveness of this action would allow fishing at levels inconsistent with the goals of the FMP and the current management measures.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### 50 CFR Part 679

**[Docket No. 250331–0057; RTID 0648–XE831]**

#### Fisheries of the Exclusive Economic Zone Off Alaska; Recreational Fishing for Chinook Salmon in the Cook Inlet Exclusive Economic Zone Area

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; closure.

**SUMMARY:** NMFS is prohibiting recreational fishing for Chinook salmon in the Cook Inlet exclusive economic zone (EEZ) Area. This action is necessary for the conservation of Cook Inlet Chinook salmon stocks that continue to be in a low state of abundance as assessed in the NMFS 2025 stock assessment and fisheries evaluation (SAFE) report and the 2025 State of Alaska forecasts of very low run strength.

**DATES:** Effective 0001 hours, Alaska local time (A.l.t.), May 1, 2025, through 2400 hours, A.l.t., August 15, 2025.

**FOR FURTHER INFORMATION CONTACT:** Adam Zaleski, 907–206–5802.

**SUPPLEMENTARY INFORMATION:** NMFS manages the Cook Inlet EEZ Area according to the Fishery Management Plan for Salmon Fisheries in the EEZ off Alaska (Salmon FMP). The intended effect of this action is to conserve and manage the salmon resources in the Cook Inlet EEZ Area in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the Salmon FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

In accordance with 50 CFR 679.118(c)(1)(ii), the Regional Administrator has determined it is necessary to close Chinook salmon recreational fishing for conservation and management purposes and is therefore prohibiting recreational fishing for Chinook salmon in the Cook Inlet EEZ

Area. In making this determination, the Regional Administrator has considered the following factors: the low proposed 2025 Chinook salmon acceptable biological catch (ABC) in the Cook Inlet EEZ Area (proposed ABC of 261 Chinook salmon; 90 FR 14771, April 4, 2025); anticipated harvest rates, expected mortality, and the potential number of participants in the commercial and recreational fisheries in the Cook Inlet EEZ Area; and the State of Alaska's 2025 prediction of run sizes. Newly released 2025 Chinook salmon forecasts from the Alaska Department of Fish and Game (ADF&G) predict very low run sizes for Chinook salmon stocks in Cook Inlet, which is likely to negatively impact the achievement of spawning escapement targets and returns during future years. As such, ADF&G has issued closures of recreational fishing in State marine waters of Upper Cook Inlet from May 1 to August 15, 2025: <https://www.adfg.alaska.gov/sf/EONR/index.cfm?ADFG=region.NR&Year=2025&NRID=3802>. This action would prohibit recreational fishing for Chinook salmon in the Cook Inlet EEZ Area during the same time period (May 1 to August 15, 2025).

#### Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is authorized by 50 CFR 679.118(c)(1)(ii), which was issued pursuant to section 304(c) of the Magnuson-Stevens Act, and is necessary to carry out the Salmon FMP. This action is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action. Notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent information regarding the status of Cook Inlet Chinook salmon stocks in a timely fashion and would delay the closure of recreational fishing for Chinook salmon in the Cook Inlet EEZ Area. A delay of this closure could result in recreational harvest of Chinook salmon that is not supported by current stock levels, which would prevent the conservation and management objectives for the Cook Inlet EEZ Area salmon fishery. NMFS developed this action as quickly as possible based on the relevant information on stock levels for Chinook salmon, primarily NMFS's finalization of the SAFE report that informs NMFS's proposed 2025 ABC for Chinook salmon (90 FR 14771, April 4,

2025) and the State's release of 2025 Chinook salmon forecasts for Cook Inlet.

Under section 553(d) of the Administrative Procedure Act, an agency must delay the effective date of an action for 30 days after publication, unless the agency finds good cause to make the action effective sooner. Pursuant to 5 U.S.C. 553(d)(3), the NOAA Assistant Administrator for Fisheries has determined that good cause exists to shorten the 30-day delay in the effective date of this action and make this rule effective May 1, 2025. This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### 50 CFR Part 679

[Docket No. 250312-0037; RTID 0648-XE811]

#### Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Vessels Using Jig Gear in the Central Regulatory Area of the Gulf of Alaska

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Temporary rule; closure.

**SUMMARY:** NMFS is prohibiting directed fishing for Pacific cod by vessels using jig gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action

is necessary to prevent exceeding the A season allowance of the 2025 total allowable catch (TAC) of Pacific cod by vessels using jig gear in the Central Regulatory Area of the GOA.

**DATES:** Effective 1200 hours, Alaska local time (A.l.t.), April 14, 2025, through 1200 hours, A.l.t., June 10, 2025.

**FOR FURTHER INFORMATION CONTACT:** Abby Jahn, 907-586-7416.

**SUPPLEMENTARY INFORMATION:** NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared and recommended by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The A season allowance of the 2025 Pacific cod TAC apportioned to vessels using jig gear in the Central Regulatory Area of the GOA is 277 metric tons (mt) as established by the final 2025 and 2026 harvest specifications for groundfish in the GOA (90 FR 12468, March 18, 2025).

In accordance with § 679.20(d)(1)(i), the Regional Administrator has determined that the A season allowance of the 2025 Pacific cod TAC apportioned to vessels using jig gear in the Central Regulatory Area of the GOA will soon be or has been reached. Therefore, the Regional Administrator is establishing a directed fishing allowance of 277 mt and is setting aside the remaining 0 mt as bycatch because it is not necessary to support other anticipated groundfish fisheries. In accordance with § 679.20(d)(1)(iii), the Regional Administrator finds that this directed fishing allowance will be or has been reached. Consequently, NMFS is

prohibiting directed fishing for Pacific cod by vessels using jig gear in the Central Regulatory Area of the GOA to prevent exceeding this sector's A season allowance of Pacific cod TAC.

While this closure is effective, the maximum retainable amounts at § 679.20(e) and (f) apply at any time during a trip.

#### Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest, as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion, and would delay the closure of Pacific cod by vessels using jig gear in the A season in the Central Regulatory Area of the GOA. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of April 9, 2025.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.
