

(k) *Quick-Release Devices*. The S-64 is specifically designed for rotorcraft load combination operations with particular weight-specified hard points designed into the airframe. Because of this unusual design, when quick release devices are required under 14 CFR part 133, it must enable the pilot to release the external-load quickly during flight. The quick-release system must comply with the following:

(1) An activating control for the quick-release system must be installed on one of the pilot's primary controls and must be designed and located so it may be operated by the pilot without hazardously limiting his or her ability to control the rotorcraft during an emergency situation.

(2) An alternative independent activating control for the quick-release system must be provided and must be readily accessible to the pilot or a crewmember.

(3) The design of the quick-release system must ensure that failure, which could prevent the release of external loads, is extremely improbable.

(4) The quick-release system must be capable of functioning properly after failure of all engines.

(5) The quick-release system must function properly with external loads up to and including the maximum weight for which certification is requested.

(6) The quick-release system must include a means to check for proper operation of the system at established intervals.

(l) *Maximum Weight with External Load*. When establishing compliance with § 29.25, the maximum weight of the rotorcraft-load combination for operations with external loads must be established by the applicant and may not exceed the weight at which compliance with all applicable requirements has been shown.

(m) *External Load Jettisoning*. The external load must be jettisonable to the maximum weight for which the helicopter has been type certificated for operation without external loads or with Class A loads.

(n) *Minimum Flight Crew*. To meet the requirements of § 29.1523, the minimum flight crew consists of a pilot and a copilot. For pickup of the external-load and on-site maneuvering and release of the external-load, the copilot may act as the aft-facing hoist operator.

(o) *Occupancy*. When engaged in operations other than external-load operations under 14 CFR part 133, the carriage of passengers in the two observer seats and the rear-facing aft-stick operator's seat, when the aft-stick operator's controls are disengaged and

the collective guard is installed, will be controlled by the FAA operating requirements applicable to that particular operation.

(p) *Operations*. The S-64 meets the Category B fire protection requirements for structures and controls in lieu of Category A requirements. Therefore, when operating over congested areas, the rotorcraft must be operated at an altitude and over routes that provide suitable landing areas that can be reached in no more than 5 minutes.

(q) *Markings and Placards*. For purposes of rotorcraft load combination operations, the following markings and placards must be displayed conspicuously and must be applied so they cannot be easily erased, disfigured, or obscured.

(1) A placard, plainly visible to appropriate crewmembers, referring to the helicopter flight manual limitations and restrictions for rotorcraft load combinations allowed under 14 CFR part 133.

(2) A placard, marking, or instructions (displayed next to the external-load attaching means) stating the maximum external-load prescribed as an operating limitation for rotorcraft load combinations allowed under 14 CFR part 133.

(3) A placard in the cockpit prescribing the occupancy limitation during rotorcraft load combination operations under 14 CFR part 133.

Issued in Fort Worth, Texas, on August 4, 2010.

Scott A. Horn,

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2009-0902; Airspace
Docket No. 09-ANM-16]

Modification of Class E Airspace; Astoria, OR

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action will amend Class E airspace at Astoria, OR, to accommodate aircraft using a new Area Navigation (RNAV) Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) at Astoria Regional Airport. This will improve the safety and management of Instrument

Flight Rules (IFR) operations at the airport. This action also will correct the airport name from Port of Astoria Airport, and makes minor adjustments to the legal description of the airspace.

DATES: Effective date, 0901 UTC, November 18, 2010. The Director of the Federal Register approves this incorporation by reference action under 1 CFR Part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT:
Eldon Taylor, Federal Aviation
Administration, Operations Support
Group, Western Service Center, 1601
Lind Avenue, SW., Renton, WA 98057;
telephone (425) 203-4537.

SUPPLEMENTARY INFORMATION:

History

On November 13, 2009, the FAA published in the **Federal Register** a notice of proposed rulemaking to amend controlled airspace at Astoria, OR (74 FR 58573). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in paragraph 6002 and 6005, respectively, of FAA Order 7400.9T signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR Part 71.1. The Class E airspace designations listed in this document will be published subsequently in that Order.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) Part 71 by amending Class E surface airspace, and adding additional Class E airspace extending upward from 700 feet above the surface, at Astoria Regional Airport, to accommodate IFR aircraft executing new RNAV GPS SIAP at the airport. This action is necessary for the safety and management of IFR operations. This action also makes a minor correction to the legal description for Class E airspace extending upward from 700 feet above the surface to coincide with the FAA's National Aeronautical Navigation Services, and corrects the airport name from Port of Astoria Airport to Astoria Regional Airport.

The FAA has determined this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not

a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106 discusses the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it establishes additional controlled airspace at Astoria Regional Airport, Astoria, OR.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E. O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR Part 71.1 of the Federal Aviation Administration Order 7400.9T, Airspace Designations and Reporting Points, signed August 27, 2009, and effective September 15, 2009 is amended as follows:

Paragraph 6002 Class E airspace designated as surface areas.

* * * * *

ANM OR E2 Astoria, OR [Modified]

Astoria Regional Airport, Astoria, OR
(Lat. 46°09′29″ N., long. 123°52′43″ W.)
Camp Rilea Heliport
(Lat. 46°06′59″ N., long. 123°55′54″ W.)

Within a 4-mile radius of the Astoria Regional Airport, and within 1.8 miles each side of the Astoria Regional Airport 268° bearing extending from the 4-mile radius to 7 miles west of the Astoria Regional Airport, and within 1.8 miles each side of the Astoria Regional Airport 095° bearing extending from the 4-mile radius to 12.1 miles east of the Astoria Regional Airport, excluding the airspace within a wedge south of Camp Rilea Heliport, from the 120° bearing clockwise to the 225° bearing of the Camp Rilea Heliport. This Class E airspace area is effective during the dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

ANM OR E5 Astoria, OR [Modified]

Astoria Regional Airport, Astoria, OR
(Lat. 46°09′29″ N., long. 123°52′43″ W.)
Seaside Municipal Airport
(Lat. 46°00′54″ N., long. 123°54′28″ W.)

That airspace extending from 700 feet above the surface within a 6.5-mile radius of Astoria Regional Airport, within 4 miles north and 8.3 miles south of the Astoria Regional Airport 268° bearing extending from the 6.5-mile radius to 15.9 miles west of Astoria Regional Airport, excluding the portion within a 1.8-mile radius of Seaside Municipal Airport; and within 4 miles northeast and 8.3 miles southwest of the Astoria Regional Airport 326° bearing extending from the 6.5-mile radius to 21.4 miles northwest of Astoria Regional Airport; and within 4 miles north and 4 miles south of the Astoria Regional Airport 096° bearing extending from the 6.5-mile radius to 12 miles east, and 8.3 miles north and 4 miles south of the Astoria Regional Airport 096° bearing from 12 miles east, to 28.3 miles east of Astoria Regional Airport; and within a 15.9-mile radius of Astoria Regional Airport extending clockwise from the 326° bearing to the 347° bearing; and within a 23.1-mile radius of Astoria Regional Airport extending clockwise from the 347° bearing to the 039° bearing extending from the 15.9-mile radius to a 23.1-mile radius of Astoria Regional Airport extending clockwise from the airport 039° bearing to the airport 185° bearing.

Issued in Seattle, Washington, on August 9, 2010.

SUPPLEMENTARY INFORMATION:

Background

On August 5, 2004, the governments of Costa Rica, the Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, and the United States signed the Dominican Republic—Central America—United States Free Trade Agreement (“CAFTA–DR” or “Agreement”).

The provisions of the CAFTA–DR were adopted by the United States with the enactment on August 2, 2005, of the Dominican Republic—Central America—United States Free Trade Agreement Implementation Act (the “Act”), Public Law 109–53, 119 Stat. 462 (19 U.S.C. 4001 *et seq.*). Section 210 of the Act requires that regulations be prescribed as necessary to implement these provisions of the CAFTA–DR.

On June 13, 2008, CBP published CBP Dec. 08–22 in the **Federal Register** (73
