

The AMNH is authorized a 5-year research permit to study green and hawksbill sea turtles at the Palmyra Atoll in the Pacific Ocean. Researchers may capture by hand or net, examine, measure, photograph, flipper and Passive Integrated Transponder tag, blood sample, carapace sample, shell etch and paint, fecal sample, measure their temperature, and release up to 300 green and 100 hawksbill sea turtles annually. The purpose of this work is to assess the population biology and connectivity of green and hawksbill sea turtles focusing on distribution and abundance, ecology, health, threats to sea turtles as well as implications for their management and conservation. A subset of animals may be gastric lavaged or have transmitters affixed to the carapace before release. Additionally, researchers are authorized to collect the carcass, tissues and/or parts of encountered dead animals from 30 green and 10 hawksbill sea turtles annually.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: July 23, 2008.

P. Michael Payne,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

RIN 0648-X189

Endangered Species; File No. 1551

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of permit.

SUMMARY: Notice is hereby given that the Southeast Fisheries Science Center (SEFSC), National Marine Fisheries Service (NMFS), 75 Virginia Beach Drive Miami, Florida 33149, has been issued a permit to take green (*Chelonia mydas*), loggerhead (*Caretta caretta*), hawksbill (*Eretmochelys imbricata*), olive ridley (*Lepidochelys olivacea*), leatherback (*Dermochelys coriacea*), and Kemp's ridley (*Lepidochelys kempii*) sea

turtles for purposes of scientific research.

ADDRESSES: The permits and related documents are available for review upon written request or by appointment in the following offices:

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)427-2521; and

Southeast Region, NMFS, 263 13th Ave South, St. Petersburg, FL 33701; phone (727)824-5312; fax (727)824-5309.

FOR FURTHER INFORMATION CONTACT:

Patrick Opay or Amy Hapeman, (301)713-2289.

SUPPLEMENTARY INFORMATION: On February 7, 2006, notice was published in the **Federal Register** (71 FR 6272) that a request for scientific research permit to take sea turtles had been submitted by the above-named institution. The requested permit has been issued under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The research will be conducted each year over the course of a five-year permit in coastal and inshore waters of the North Atlantic, Gulf of Mexico and Caribbean Sea (including embayments and tributaries). Turtles will be taken by harassment (e.g., aerial surveys) and direct capture (pound nets, entanglement/strike nets, seine nets, hoop nets, dipnets, cast nets, and by hand). Researchers will also access animals legally captured incidental to fishing activities where covered by the incidental take statement (ITS) of an ESA section 7 biological opinion or by an ESA incidental take permit. Animals used in this research could also be obtained from other Section 10 permitted research activities. Researchers will conduct a variety sampling and tagging activities in order to collect biological and ecological information on these species that will help efforts to conserve them.

Issuance of this permit, as required by the ESA, was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: July 25, 2008.

RIN 0648-XJ29

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery off the Southern Atlantic States

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Tom Burgess of Sneads Ferry, North Carolina. If granted, the EFP would authorize the applicant, with certain conditions, to collect limited numbers of snapper and grouper using chevron traps, a prohibited gear type, and compare results from inside and outside a proposed marine protected area (MPA). Acoustic sonar would be utilized to collect catch-per unit-effort (CPUE) data. This study is intended to collect data to develop a model for estimating deep-water snapper-grouper abundance in South Atlantic Federal waters.

DATES: Comments must be received no later than 5 p.m., Eastern time, on August 29, 2008.

ADDRESSES: You may submit comments on the application by any of the following methods:

- e-mail: Burgess.EFP@noaa.gov.

Include in the subject line the following: "Comment on Burgess EFP Application."

- Fax: 727-824-5308, Attn: Kate Michie.

- Mail: Kate Michie, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.

The application and related documents are available for review upon written request to the address above or the e-mail address below.

FOR FURTHER INFORMATION CONTACT: Kate Michie, 727-824-5305; fax 727-824-5308; e-mail: Kate.Michie@noaa.gov.

SUPPLEMENTARY INFORMATION: The EFP is requested under the authority of the
