SUPPLEMENTARY INFORMATION:**I. Abstract**

This request is for an extension of a currently approved information collection. National Marine Fisheries Service (NMFS) has issued regulations under authority of the Western and Central Pacific Fisheries Convention Implementation Act (WCPFCIA; 16 U.S.C. 6901 *et seq.*) to carry out the obligations of the United States under the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Convention), including implementing the decisions of the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Commission). The regulations include a requirement for the owners and operators of U.S. vessels that fish for highly migratory species on the high seas in the Convention Area to carry and operate near real-time satellite-based position-fixing transmitters ("Vessel Monitoring System-VMS-units") at all times except

when the vessel is in port. As part of this requirement, vessel owners and operators must transmit: (1) "On/off reports" to NMFS whenever the VMS unit is turned off while the vessel is in port, (2) "activation reports" to NMFS prior to the first use of a VMS unit, and (3) automatic "position reports" from the VMS unit to NOAA and the Commission as part of a VMS operated by the Commission (50 CFR 300.45). Under this information collection, it is expected that vessel owners and operators would also need to purchase, install, and occasionally maintain the VMS units.

The information collected from the vessel position reports is used by NOAA and the Commission to help ensure compliance with domestic laws and the Commission's conservation and management measures, and are necessary in order for the United States to satisfy its obligations under the Convention.

II. Method of Collection

Respondents may submit on/off reports by facsimile or email, and they may submit activation reports by mail, facsimile or email. Position reports are transmitted electronically and automatically from the VMS unit.

Form Number: None.

Type of Review: Regular submission (extension of a currently approved information collection).

Affected Public: Business or other for-profit organizations; individuals or households.

Estimated Number of Respondents: 78.

Estimated Total Annual Burden Hours: 192.

Estimated Total Annual Cost to Public: \$136,111 in capital costs and recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the
