Therefore, a statement under section 202 of the Act is not required.

Federalism

The Department has considered this rule under the requirements of Executive Order 13132, Federalism. The Department has determined that the rule conforms with the federalism principles set out in this Executive order; will not impose any significant compliance costs on the States; and will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

Authority: 5 U.S.C. 301; and Secs. 6 and 15, 90 Stat. 2949, 2952, 2958 (16 U.S.C. 1604, 1613).

Appendix B to § 219.35

Interpretative Rule Related to Paragraphs 219.35(a) and (b)

The Department is clarifying the intent of the transition provisions of paragraphs (a) and (b) of this section with regard to the consideration and use of the best available science to inform project decisionmaking that implements a land management plan as follows:

1. Under the transition provisions of paragraph (a), the responsible official must consider the best available science in implementing and, if appropriate, in amending existing plans. Paragraph (b) allows the responsible official to elect to prepare plan amendments and revisions using the provisions of the 1982 planning regulation until a new final planning rule is adopted. A proposed rule to revise the November 9, 2000, planning regulations was published in the **Federal Register** on December 6, 2002 (67 FR 72770). A new final rule has not been promulgated.

2. Until a new final rule is promulgated, the transition provisions of § 219.35 remain in effect. The 1982 rule is not in effect. During the transition period, responsible officials may use the provisions of the 1982 rule to prepare plan amendments and revisions. Projects implementing land management plans must comply with the transition provisions of § 219.35, but not any other provisions of the 2000 planning rule. Projects implementing land management plans and plan amendments, as appropriate, must be developed considering the best available science in accordance with § 219.35(a). Projects implementing land management plans must be consistent with the provisions of the governing plan.
