SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

Voluntary Reporting of Greenhouse Gases Program collections are conducted pursuant to Section 1605(b) of the Energy Policy Act of 1992 (Pub. L. 102-486, 42 U.S.C. 13385) under revised General and Technical Guidelines issued by the DOE's Office of Policy and International Affairs in April 2006 and April 2007, respectively. The EIA-1605 form is designed to collect voluntarily reported data on greenhouse gas emissions, achieved reductions of these emissions, and increased carbon fixation. A summary of the initial results of the Voluntary Reporting of Greenhouse Gases Program under the revised program guidelines will appear in the Program's annual report titled Voluntary Reporting of Greenhouse Gases. Later this year, once it is available, EIA will post the annual report on the program's webpage at <http://www.eia.doe.gov/oiaf/1605/index.html>. For annual reports issued under the original program guidelines go to http://www.eia.doe.gov/oiaf/1605/1605b_old.html. Additionally, EIA produces and makes publicly available, a "public-use" database containing all the non-confidential information reported to EIA's Voluntary Reporting of Greenhouse Gases Program on the Forms EIA-1605. Once these data are finalized, EIA will make them available at the program's Web page (<http://www.eia.doe.gov/oiaf/1605/index.html>). Data submitted under the original program, meanwhile, is also available on the program's webpage (<http://www.eia.doe.gov/oiaf/1605/OldDatabases.html>).

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of information conducted by or in conjunction with the EIA. Any comments received help the EIA to prepare data requests that maximize the

utility of the information collected and to assess the impact of collection requirements on the public. Also, the EIA will later seek approval by the Office of Management and Budget (OMB) under Section 3507(a) of the Paperwork Reduction Act of 1995.

II. Current Actions

As a result of the experience gained in the implementation of the first reporting cycle under the revised guidelines launched on November 18, 2009, the EIA plans to slightly revise Form EIA-1605 and the accompanying instructions. These revisions fall into the following three categories: Caption/instruction changes, grid changes, and changes to the form designed to bring greater conformity between the paper form and the electronic form used by respondents via EIA's Internet Survey Management System (ISMS). Summaries of the three types of changes are provided below. Note, that in the proposed revised forms posted on EIA's webpage (<http://www.eia.doe.gov/oiaf/1605/omb2010.html>), EIA will highlight sections of the forms that have been revised.

Caption/Instruction Changes

EIA has made contextual changes to the captions and explanatory text in Schedule I, Schedule II, Schedule III and Schedule IV in order to provide respondents with effective guidance for properly completing both the paper and electronic versions of the form. These changes were made in response to usability testing as well as internal review. Changes have also been made to correct errors, including typos, in the previously approved forms.

Emissions Inventory Grid Changes

EIA has modified the emissions inventory grids in Schedule I, Section 2, Part B and Addendum A to include two additional columns with the captions "Fuel Type" and "Specific Facility/Source Name (optional)". These columns are needed in order to disaggregate the estimation methods and associated ratings reported on the electronic form and, therefore, allow the system to calculate a weighted rating of the emission inventory methods used by respondents. EIA also revised some of the emission sources listed in the inventory grids to align them with the sources and methods identified in the Technical Guidelines.

Changes To Accommodate the Electronic Form

EIA has modified several existing questions and added a few additional questions to Schedule I and II to bring
