Proposal To Approve Under OMB Delegated Authority the Implementation of the Following Report

Report title: the Consolidated Bank Holding Company Report of Equity Investments in Nonfinancial Companies.

Agency form number: FR Y-12.

Frequency: Quarterly and semi-annually.

Reporters: Bank holding companies.

Annual reporting hours: 14,112 hours.

Estimated average hours per response: 16 hours.

Number of respondents: 232.

Small businesses are affected.

General description of report: This information collection is mandatory (12 U.S.C. 1844(c)) and data may be exempt from disclosure pursuant to sections (b)(4) and (b)(8) of the Freedom of Information Act (5 U.S.C. 552(b)(4) and (8)).

Current Actions: The Federal Reserve proposes to implement the mandatory FR Y-12. The FR Y-12 would collect information from certain domestic bank holding companies on their investments in nonfinancial companies on three schedules: Type of Investments, Type of Security, and Type of Entity within the Banking Organization. Large bank holding companies would report on a quarterly basis, and small bank holding companies would report semi-annually.

BHC investments in nonfinancial companies have increased significantly over the past several years. These investments have contributed significantly to earnings and capital at institutions actively involved in this business line. Equity investments also have contributed to the volatility of earnings and capital in recent periods and have increased some institutions' risk profiles. The GLB Act permits financial holding companies to make investments in any amount in any type of nonfinancial company as part of a securities underwriting or merchant or investment banking activity. The investments permissible under the GLB Act's merchant banking authority are substantially broader in scope than the investment activities otherwise permissible for BHCs. Thus, these investments present the potential for additional volatility and risk in banking organizations' portfolios.

The FR Y-12 would provide valuable supervisory information that would permit examiners and other supervisory staff to monitor the on-going growth and contribution to profitability of this increasingly active business line. For institutions active in this business line, annual reviews generally are conducted.

The FR Y-12 would serve as an important risk-monitoring device for institutions active in this business line by allowing supervisory staff to monitor an institution's activity between review dates. It also could serve as an "early warning" mechanism to identify institutions whose activities in this area are growing rapidly and that, therefore, may warrant special supervisory attention.

On January 31, 2001, the Board and the Treasury Department published a final rule in the **Federal Register** on merchant banking investments made by financial holding companies (66 FR 8466). In Section 225.175 of this final rule, the two agencies stated that reporting forms to fulfill the quarterly and annual reporting requirements associated with this rule would be published separately. Institutions will not be held responsible for these reporting requirements until the reporting forms are finalized. This proposal covers the quarterly reporting requirements; the reporting forms for the annual reporting requirements will be addressed in a separate proposal later this year. The annual report would obtain information on merchant banking investments that have been held for an extended period of time.

The Federal Reserve would also like to solicit public comment on the burden of collecting a memorandum item on consolidated recognized gains or losses on equity investments in nonfinancial companies. This item is being considered for purposes of determining what portion of a BHC's consolidated net income is derived from equity investment activities.

Board of Governors of the Federal Reserve System, May 4, 2001.

Jennifer J. Johnson,

Secretary of the Board.
