

skepticism<sup>10</sup> to determine how these characteristics affect the likelihood that someone becomes a victim of consumer fraud. In addition, staff anticipates collecting demographic information from the surveyed subjects.

#### *B. Estimated Burden Hours*

The FTC plans to seek information from approximately 5,000 respondents using a questionnaire that should take no more than 30 minutes to complete. Prior to that, a pre-test of up to 100 participants will be conducted. Allowing for an extra two minutes for questions unique to the pretest, the pretest should total no more than 32 minutes to complete. Accordingly, the information collection burden of the Internet Panel study should total no more than 2,553 hours. Finally, the cost per respondent should be negligible. Participants will be compensated for their participation in the study using the contractor's standard method of rewarding members of its Internet panel for survey participation. Participation is voluntary and will not require start-up, capital, or labor expenditures by respondents.

By direction of the Commission.
