

fair opportunity for the expression and consideration of various positions and for public participation.

The MHCC is deemed an advisory committee not composed of Federal employees.

Public Comment

Citizens wishing to make comments on the business of the MHCC are encouraged to register by or before Monday, February 5, 2024, by contacting the Administering Organization (AO), Home Innovation Research Labs; Attention: Kevin Kauffman, 400 Prince Georges Blvd., Upper Marlboro, MD 20774, or email to mhcc@homeinnovation.com or call 1-888-602-4663. Written comments are encouraged. All written comments must be provided to mhcc@homeinnovation.com no later than Monday, February 12, 2024. Advance registration for both meetings is strongly encouraged.

Please note, written comments submitted will not be read during the meeting but will be provided to the MHCC members prior to the meeting. The MHCC will also provide an opportunity for oral public comments on specific matters before the MHCC at each meeting. The total amount of time for oral comments will be 30 minutes, in two 15-minute periods, with each commenter limited to two minutes to ensure pertinent Committee business is completed and all public comments can be expressed. The Committee will not respond to individual written or oral statements; however, it will take all public comments into account in its deliberations. The MHCC strives to accommodate citizen comments to the extent possible within the time constraints of the meeting agenda.

Noting the complexity of the Department of Energy's (DOE's) Energy Conservation Rule as it works to align energy conservation standards with its Manufactured Housing Construction and Safety Standards, HUD is scheduling two meetings of the MHCC to allow robust discussion, analysis, and consideration of the notice of proposed rulemaking, Energy Conservation Program: Energy Conservations Standards for Manufactured Housing; Enforcement published by DOE on December 23, 2024 at 88 FR 88844 (the "DOE NPR"). These meetings are scheduled for two days to provide sufficient time for thorough consideration. HUD, therefore, strongly encourages active participation by committee members, stakeholders, and other interested parties.

[Docket No. FWS–R6–ES–2021–0056; FF06E21000 245 FXES11140600000]

Endangered and Threatened Wildlife and Plants; Proposed Amendment to Programmatic Safe Harbor Agreement and Candidate Conservation Agreement With Assurances for Kansas Aquatic Species

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), are announcing the availability of documents associated with an application to amend an enhancement of survival permit (permit) under the Endangered Species Act. The Kansas Department of Wildlife and Parks has applied to amend the existing *Programmatic Safe Harbor Agreement and Candidate Conservation Agreement with Assurances for 15 Aquatic Species in Kansas* (SHA/CCAA) by adding 6 additional covered species: Lake sturgeon (*Acipenser fulvescens*), sicklefin chub (*Macrhybopsis meeki*), sturgeon chub (*Macrhybopsis gelida*), snuffbox mussel (*Epioblasma triquetra*), spectaclecase (*Cumberlandia monodonta*), and Ouachita kidneyshell (*Ptychobranchius occidentalis*). The documents available for review and comment are the applicant's proposed amended programmatic SHA/CCAA, which is part of the permit amendment application, and our draft environmental action statement and low-effect screening form, which support a categorical exclusion for the amendment under the National Environmental Policy Act. We invite comments from the public and Federal, Tribal, State, and local governments.

DATES: We will accept comments received or postmarked on or before March 4, 2024. Comments submitted online at <https://www.regulations.gov>

(see **ADDRESSES**) must be received by 11:59 p.m. eastern time on March 4, 2024.

ADDRESSES:

Obtaining Documents: The documents this notice announces, as well as any comments and other materials that we receive, will be available for public inspection online in Docket No. FWS–R6–ES–2021–0056 at <https://www.regulations.gov>.

Submitting Comments: To submit written comments, please use one of the following methods, and note that your information request or comments are in reference to the Kansas Aquatic SHA/CCAA amendment.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), have received an application from the Kansas Department of Wildlife and Parks (KDWP, applicant) to amend their existing 50-year enhancement of survival permit (permit) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The amendment requests the addition of 6 species to the 15 species already covered by the applicant's approved programmatic safe harbor agreement (SHA) and candidate conservation agreement with assurances (CCAA) on non-Federal lands in the State of Kansas. The documents available for review and comment are the applicant's proposed amended programmatic SHA/CCAA, which is part of the permit amendment application, and our draft environmental action statement and low-effect screening form for the amendment request, which support a categorical exclusion under the National

Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). We invite comments on documents from the public and Federal, Tribal, State, and local governments.

Background

Via a **Federal Register** notice published on September 15, 2021 (86 FR 51366), we announced the availability of KDWP's original application for an enhancement of survival permit with a 50-year term, which included a proposed programmatic SHA/CCAA for 14 aquatic species in Kansas, and our draft environmental action statement and low-effect screening form, which supported a categorical exclusion under NEPA. The comment period was open until October 15, 2021. After considering the application, associated materials, and the 15 public comments received, we issued the requested permit. On October 12, 2022, we announced via a **Federal Register** notice (87 FR 62114) the availability of KDWP's subsequent application to amend their enhancement of survival permit to include one additional covered species, the western fanshell (*Cyprogenia aberti*). The comment period for the amendment was open until November 14, 2022, and we issued the requested amended permit after considering the application, associated materials, and the three public comments received. To provide background information, we have made the original 2021 proposed programmatic SHA and CCAA, and the 2022 amendment, along with related documents and comments, available for review in <https://www.regulations.gov> under Docket No. FWS–R6–ES–2021–0056. However, we will not be taking further comments on those documents.

Safe Harbor Agreements and Candidate Conservation Agreements With Assurances

An SHA is an agreement between the Service, partners, and landowners for voluntary management of non-Federal lands to contribute towards recovery of ESA-listed species in a manner that is consistent with the Service's policy on SHAs (64 FR 32717, June 17, 1999) and applicable regulations. A CCAA is an agreement between the Service, partners, and landowners for voluntary management of non-Federal lands to remove or reduce key threats to species that may become listed under the ESA, in a manner that is consistent with the Service's policy on CCAAs (81 FR 95164, December 27, 2016) and applicable regulations. In return for

implementing conservation measures in a SHA/CCAA, the Service gives participants assurances that the Service will not impose land, water, or resource use restrictions or conservation requirements on ESA-listed species, or those that may become listed, beyond those agreed to in the SHA/CCAA.

Applicant's Proposed Amendment to Programmatic Safe Harbor Agreement/Candidate Conservation Agreement With Assurances

KDWP's purpose in amending its programmatic SHA/CCAA is to add the lake sturgeon, sicklefin chub, sturgeon chub, snuffbox mussel, spectaclecase, and Ouachita kidneyshell, to facilitate the reintroduction and implementation of conservation measures for the species on non-Federal lands in Kansas. The documents available for review and comment are the proposed amended programmatic SHA/CCAA, which is part of the permit application, and our draft environmental action statement and low-effect screening form, which support a categorical exclusion under NEPA.

To enroll in the programmatic SHA/CCAA, a non-Federal landowner would enter into a landowner agreement with KDWP to enroll all or a portion of their property under the SHA and/or CCAA. Upon signature by both parties, KDWP would issue a certificate of inclusion to the non-Federal landowner, extending assurances and take authorization to the participating landowner for the appropriate covered species. The requested permit duration is for 50 years, starting on December 15, 2021 (the date of original permit issuance). Proposed conservation measures include the introduction, reintroduction, augmentation (release of individuals to supplement an existing population), or translocation of the covered species, and protection or enhancement of aquatic, wetland, riparian, or adjacent upland habitats for the covered species. Conservation measures would be site specific, and would be developed by the participating landowner and KDWP. Incidental take of covered species may occur as a result of the implementation of conservation measures or ongoing land management activities on the enrolled lands.

Covered Species

The addition of the 6 species to the 15 species in the existing agreement would bring the total number of species covered under the CCAA/SHA to 21. All 21 species are in the table below.
