Interested groups and individuals are
encouraged to attend and present oral
comments on the environmental
impacts described in the DEIS.
Transcripts of the meetings will be
prepared.

After these comments are reviewed,
any significant new issues are
investigated, and modifications are
made to the DEIS, a final environmental
impact statement (FEIS) will be
published and distributed by the staff.
The FEIS will contain the staff's
responses to timely comments received
on the DEIS.

Comments will be considered by the
Commission but will not serve to make
the commentor a party to the
proceeding. Any person may file a
motion to intervene on the basis of the
Commission staff's DEIS (see Title 18
Code of Federal Regulations, Part
385.214). You do not need intervenor
status to have your comments
considered.

All intervenors, agencies, elected
officials, local governments, special
interest groups, libraries, media, and
anyone providing written comments on
the DEIS will receive a copy of the FEIS.
If you do not wish to comment on the
DEIS but wish to receive a copy of the
FEIS, you must write to the Secretary of
the Commission indicating this request.

The DEIS has been placed in the
public files of the FERC and is available
for public inspection at: Federal Energy
Regulatory Commission, Public
Reference and Files Maintenance
Branch, 888 First Street, N.E., Room 2A,
Washington, DC 20426, (202) 208-1371.

A limited number of copies are
available from the Public Reference and
Files Maintenance Branch identified
above. In addition, the DEIS has been
mailed to Federal, state, and local
agencies; public interest groups;
individuals, and affected landowners
who requested a copy of the DEIS;
libraries; newspapers; and parties to this
proceeding. The document is also
available for viewing on the FERC
website at www.ferc.fed.us, using the

"RIMS" link to information in this
docket number. For assistance with
access to RIMS, the RIMS helpline can
be reached at (202) 208-2222.

Additional information about the
proposed project is available from Paul
McKee in the Commission's Office of
External Affairs, at (202) 208-1088 or on
the FERC website described in the
preceding paragraph. Access to the texts
of formal documents issued by the
Commission with regard to this docket,
such as orders and notices, is also

SUPPLEMENTARY INFORMATION: *Affected
Entities:* Entities potentially affected by
this action are those which produce,
import, export, destroy, transform as a
feedstock, and distribute controlled
ozone-depleting substances.

Title: Record Keeping and Periodic
Reporting of the Production, Import,
Recycling, Destruction, Transshipment
and Feedstock Use of Ozone-Depleting
Substances, EPA Number 1432.17; OMB
Number 2060-0170; with an extended
expiration date of 1/31/01.

Abstract: The international treaty The
Montreal Protocol on Substances that
Deplete the Ozone Layer (Protocol) and
Title VI of the Clean Air Act (CAA)
establish limits on total U.S. production,
import and export of class I and class II
controlled ozone-depleting substances.
The U.S. is obligated under the Protocol
to cease production and import of class
I controlled substances with exemptions
for essential-uses, previously used
material, and material that will be
transformed, destroyed or exported to
developing countries. The Protocol also
establishes limits and reduction
schedules leading to the eventual
phaseout of class II controlled
substances and methyl bromide with
similar exemptions beyond the
phaseout. The CAA has its own limits
on production and consumption of
controlled substances that EPA must
enforce using the information
submitted.

To ensure U.S. compliance with the
limits and restrictions established by the
Protocol and the CAA, the regulation
establishes control measures for
individual companies. The limits and
restrictions for individual U.S.
companies are monitored by EPA
through the reporting requirements
established in the regulation under 40
CFR Part 82, Subpart A. The
information submitted to EPA is entered
into the Stratospheric Protection
Tracking System. The Tracking System
allows EPA to conduct compliance
monitoring of individual companies, as
well as compliance monitoring for the
U.S. with respect to Protocol obligations
and statutory requirements under the
CAA.

EPA uses the information to direct
special attention to illegal activities
associated with the import of both
newly produced and previously used
controlled substances. Illegal imports
and the avoidance of the tax on these

chemicals reduce the incentive to shift to alternative substances that do not deplete the ozone layer and penalize companies who are complying with U.S. laws. EPA is active in the Federal inter-agency taskforce conducting nationwide enforcement actions against illegal imports. The information provided to EPA in response to the accelerated phaseout regulations often form the basis and support for these enforcement cases.

The regulation outlines both record keeping and reporting requirements. These reporting requirements are designed: (1) To satisfy U.S. obligations under the international treaty, the Montreal Protocol on Substances that Deplete the Ozone Layer, in particular the requirements under Article 7 of the Protocol; (2) to fulfill statutory obligations under Section 603(b) of Title VI of the CAA; (3) to report to Congress on the production, use and consumption of class I and class II controlled substances as statutorily required in Section 603(d) of the CAA; and (4) to address Federal and industry concerns regarding illegal imports of newly produced and previously used controlled substances that are undercutting the U.S. markets for alternatives.

The information submitted to EPA is maintained in a Tracking System that allows the Agency: (1) To maintain control over total production and

consumption of controlled substances to satisfy conditions of the CAA and fulfill U.S. obligations under the Protocol; (2) to monitor compliance with limits and restrictions on production, imports, exports and specific exemptions to the phaseout for individual U.S. companies; and (3) to enforce against illegal importers and other violations related to the control of class I and class II controlled substances. Reporting on the exemptions permits a person to retain the benefit of being able to produce or import a controlled class I ozone-depleting substance beyond the date of complete phaseout.

Pursuant to regulations 40 CFR part 2, subpart B, you are entitled to assert a business confidentiality claim covering any part of the submitted business information as defined in 40 CFR 2.201(c).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Burden Statement: The burden hours shown below represent the hours for the renewal of the information collection request (ICR). EPA is concurrently working on many rules that will revise the record keeping and reporting under the regulations in 40 CFR Part 82, Subpart A. These future revisions to the record keeping and reporting requirements will be accompanied by future revisions to the ICR that will be published along with the separate rulemakings. In addition, EPA is in the process of reflecting these many revisions in a changed Guidance Document on reporting (including reporting forms). EPA is also working toward making the reporting forms available electronically as well as creating a secure system for the direct submission of electronic reporting.

Burden mean the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and

maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The accelerated phaseout rule for ozone-depleting substances requires respondents to submit reports to the Agency and maintain records. Operating and maintenance (O&M) costs include file storage, photocopying, and postage. Operating and maintenance costs also include the general upkeep of start-up capital equipment, as well as any purchase of services such as contractor

or auditing services. The O&M costs are estimated at \$3,032 for the accelerated phase out rule for ozone-depleting substances.

Summary Bottom Line Burden Hours and Costs: (a) Respondent's annual burden hours, \$6,876; (b) Respondent's annual labor costs, \$536,328; (c) Respondent's capital/start-up costs (ICR renewal notice), \$0; (d) Respondent's O & M costs, \$3,032; (e) Agency's annual burden hours, \$2,159; (f) Agency's annual labor costs, \$102,125.

Send comments regarding these matters, or any other aspects of the information collection, including suggestions for reducing the burden, to the address listed in the **ADDRESSES** section of this Notice.

Dated: August 23, 2000.

Acting Director, Office of Atmospheric Programs.
