

solicitation provisions and contract clauses containing information collection requirements that are associated with rights in technical data and computer software. DoD needs this information to implement 10 U.S.C. 2320, Rights in technical data, and 10 U.S.C. 2321, Validation of proprietary data restrictions. DoD uses the information to recognize and protect contractor rights in technical data and computer software that are associated with privately funded developments; and to ensure that technical data delivered under a contract are complete and accurate and satisfy contract requirements.

Annual Responses: 526,630.

Average Burden per Response: about 2.9 hours.

Summary of Information Collection

DoD uses the following DFARS provisions and clauses in solicitations and contracts to require offerors and contractors to identify and mark data or software requiring protection from unauthorized release or disclosure in accordance with 10 U.S.C. 2320:

252.227-7013, Rights in Technical Data—Noncommercial Items.

252.227-7014, Rights in Noncommercial Computer Software and Noncommercial Computer Software Documentation.

252.227-7017, Identification and Assertion of Use, Release, or Disclosure Restrictions.

252.227-7018, Rights in Noncommercial Technical Data and Computer Software—Small Business Innovation Research (SBIR) Program.

In accordance with 10 U.S.C. 2320(a)(2)(D), DoD may disclose limited rights data to persons outside the Government, or allow those persons to use limited rights data, if the recipient agrees not to further release, disclose, or use the data. Therefore, the clause at DFARS 252.227-7013, Rights in Technical Data—Noncommercial Items, requires the contractor to identify and mark data or software that it provides with limited rights.

In accordance with 10 U.S.C. 2321(b), contractors and subcontractors at any tier must be prepared to furnish written justification for any asserted restriction

on the Government's rights to use or release data. The following DFARS clauses require contractors and subcontractors to maintain adequate records and procedures to justify any asserted restrictions:

252.227-7019, Validation of Asserted Restrictions—Computer Software.

252.227-7037, Validation of Restrictive Markings on Technical Data.

In accordance with 10 U.S.C. 2320, DoD must protect the rights of contractors that have developed items, components, or processes at private expense. Therefore, the clause at DFARS 252.227-7025, Limitations on the Use or Disclosure of Government-Furnished Information Marked with Restrictive Legends, requires a contractor or subcontractor to submit a use and non-disclosure agreement when it obtains data from the Government to which the Government has only limited rights.

The provision at DFARS 252.227-7028, Technical Data or Computer Software Previously Delivered to the Government, requires an offeror to identify any technical data or computer software that it previously delivered, or will deliver, under any Government contract. DoD needs this information to avoid paying for rights in technical data or computer software that the Government already owns.

Title: Mathematics and Science Partnerships Grant Programs Annual Performance Report.

Frequency: Annually.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs.

Reporting and Recordkeeping Hour Burden:

Responses: 600.

Burden Hours: 8,400.

Abstract: Sections 2201-2203 of the Elementary and Secondary Education Act describe information to be included in the annual performance report required of the Mathematics and Science Partnerships Grant program. Submission of the annual performance report (APR) via the data collection site has taken place since 2006 and will continue to occur between October 30

and November 30 of each year. If APR data submitted during this timeframe are incomplete or inaccurate and/or if re-submission of data is requested by the State education agencies (SEAs), additional data collection may occur at other times throughout the year. The Government Performance and Results Act (GPRA) report provides national-level achievement data for all: (1) The percentage of MSP teachers who significantly increase their content knowledge, as reflected in project-level pre- and post-assessments; (2) the percentage of students in classrooms of MSP teachers who score at the basic level or above in State assessments of mathematics or science; (3) the percentage of students in classrooms of MSP teachers who score the proficient level or above in State assessments of mathematics or science; (4) the percentage of students in classrooms of MSP teachers who score at the proficient level or above in State assessments of mathematics or science measures. The national-level information includes an average of the percentage of proficient students in SEAs administering annual state performance examinations from the previous year to the current year. All projects are included in the GPRA report, regardless of when the project began implementation of their MSP grant.
