SUPPLEMENTARY INFORMATION:

- I. Background
- II. Current Actions
- III. Request for Comments

I. Background

The Federal Energy Administration Act of 1974 (Pub. L. No. 93-275, 15 U.S.C. 761 *et seq.*) and the DOE Organization Act (Pub. L. No. 95-91, 42 U.S.C. 7101 *et seq.*) require the DOE to carry out a centralized, comprehensive, and unified energy information program. This program collects, evaluates, assembles, analyzes, and disseminates information on energy resource reserves, production, demand, technology, and related economic and statistical information. This information is used to assess the adequacy of energy resources to meet near and longer term domestic demands.

The EIA, as part of its effort to comply with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. Chapter 35), provides the general public and other Federal agencies with opportunities to comment on collections of energy information conducted by or in conjunction with the EIA. Any comments received help the DOE to prepare data requests that maximize the utility of the information collected, and to assess the impact of collection requirements on the public. Also, the DOE will later seek approval of this collection of information by the Office of Management and Budget (OMB) under section 3507(a) of the Paperwork Reduction Act of 1995.

The DOE collects information on the generation, distribution, and transmission of electric energy. The

DOE collects information on emergency situations in electric energy supply systems so that appropriate Federal emergency response measures can be implemented in a timely and effective manner.

The purpose of this notice is to seek public comment on the revised Form OE-417, "Emergency Incident and Disturbance Report," used to report electric emergency incidents and disturbances to the DOE. The Form OE-417 reports will enable the Department to monitor electric emergency incidents and disturbances in the United States (including all 50 States, the District of Columbia, Puerto Rico, U.S. Virgin Islands, and the U.S. Trust Territories) so that the Government may help prevent the physical or virtual disruption of the operation of any critical infrastructure.

Currently, DOE's Office of Electricity Delivery and Energy Reliability (OE) uses Form OE-417 to monitor major system incidents on electric power systems and to conduct after-action investigations on significant interruptions of electric power. The information is used to meet DOE national security responsibilities and requirements as set forth in the U.S. Department of Homeland Security's National Response Framework. The information may also be used in developing legislative recommendations/reports to Congress and coordinating Federal efforts regarding activities such as incidents/disturbances in critical infrastructure protection, continuity of electric industry operations, and continuity of operations. The information submitted may also be used by the Energy Information Administration to analyze significant interruptions of electric power.

II. Current Actions

The OE is considering adding an additional criterion under the "Criteria for Filing" which would require facilities to report and contingencies involving extreme events which put stress on part(s) of an electric grid. These events may or may not cause service interruptions to customers.

The information requested in Schedule 2 will be revised to allow respondents to have one area of the OE-417 form in which all the information is treated as protected. Previously, contact information included in Schedule 1 will be moved into Schedule 2 with no additional changes. In the Narrative of Schedule 2, a box has been added which allows respondents to put in the date of the "Estimated Restoration Date for all Affected Customers Who
