SUPPLEMENTARY INFORMATION: A notice published in the **Federal Register** on September 2, 2022 (87 FR 54173), requested comments and information from the public about how to update the United States Department of Agriculture (USDA) organic regulations on inert ingredients in pesticides used in organic production. This advance notice of proposed rulemaking (ANPR) established a 60-day comment period, ending November 1, 2022. During this comment period, AMS received requests from two industry organizations asking for additional time to submit comments, citing the complexity of the questions

and topic. Further, one organization notes that this comment period overlaps with two other National Organic Program (NOP) comment periods: Organic Livestock and Poultry Standards (87 FR 48562), closing October 11, 2022, and the National Organic Standards Board Meeting (87 FR 37495), closing September 29, 2022.

AMS is extending the comment period by 60 days to encourage constructive input on the topics raised by the ANPR. The September 2, 2022, ANPR includes numerous specific alternatives and questions for commenter consideration. Included for reference in this docket (AMS–NOP–21–0008) are several documents to aid consideration and evaluation of these questions, including: NOSB recommendations; copies of EPA List 3, List 4A, and List 4B; National List petition procedures; and a 2015 spreadsheet identifying inert ingredients used in organic production (based on a 2011 survey by the Organic Materials Review Institute).

Comments received would inform AMS's approach on this topic regarding the allowance of inert ingredients in organic production. We ask that commenters please fully explain all views and alternative solutions or suggestions and supply examples, data, or other information to support those views. Substantive, well-reasoned, and constructive comments will assist AMS in identifying challenges and evaluating alternatives as we move forward with rulemaking.
