

New information provided by the company shows that the Poole facility began shipping completed hydraulic pumps back to the United States during December 2001, which is beyond the scope of the relevant period of the initial investigation. Therefore, petitioners are encouraged to reapply for TAA, so an investigation can be conducted to establish these new facts as they relate to the workers of the subject firm during the relevant time frame.

### Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 4th day of February 2002.
