

research permits are generally categorically excluded from the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) requirements to prepare an EA or environmental impact statement (EIS). However, because of the magnitude and intensity of proposed research, which is largely related to the recent funding opportunities, and the intense public interest in this species, NMFS determined that an EA was warranted. For additional information on recent funding, see the notice of availability of funds for the Steller Sea Lion Research Initiative (66 FR 15842). An EA was prepared on the issuance of the proposed permits, resulting in a finding of no significant impact, and is available for review as a companion document to the scientific research permit applications. The EA also considered proposed takes of Steller sea lions by aerial/vessel survey, harassment during scat collection and behavioral observations, as requested in an application for a scientific research permit submitted by the Aleutians East Borough, File No. 1010-1641. A notice of receipt of this application was published on August 22, 2001 (66 FR 44120) and a decision was deferred pending preparation of the EA.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of these applications to the Marine Mammal Commission and its Committee of Scientific Advisors.
