

Number of Responses and Respondents: 75 respondents and 75 responses.

Estimated Time per Response: 1 hour-50 hours.

Frequency of Response: Annual reporting requirement.

The Commission has authority for this information collection pursuant to the Communications Act of 1934 Sections 4, 48, 48 Stat. 1066, as amended, 47 U.S.C. 154 unless otherwise noted. Interpret or apply Sections 211, 219, 48 Stat. 1073, 1077, as amended; 47 U.S.C. 211, 219 and 220.

Total Annual Burden: 736 hours.

Total Annual Cost: None.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: In general there is no need for confidentiality with this collection of information.

Needs and Uses: On May 12, 2011, the Federal Communications Commission adopted a First Report and Order and Further Notice of Proposed Rulemaking (FCC 11–76) in Reporting Requirements for U.S. Providers of International Telecommunications Services, Amendment of Part 43 of the Commission's Rules, IB Docket No. 04–112 (rel. May 13, 2011). In the First Report and Order portion of that document (First Report and Order), the Commission amended the international reporting requirements in Section 43.82 that requires carriers annually to report the status of the international transmission circuits they owned or leased on December 31st of the preceding year. In the First Report and Order, the Commission also eliminated the circuit-addition report in Section 63.23(e) of the Commission's rules.

In the First Report and Order, the Commission retained the annual circuit-status report contained in Section 43.82, but eliminated the requirement that filing entities separately report circuits between the conterminous 48 states and offshore U.S. points such as Guam and the U.S. Virgin Islands and circuits between such offshore U.S. points and foreign points.

In the First Report and Order, the Commission also removed the requirement that filing entities file the circuit-addition report in section 63.23(e) of the rules. The Commission found that the section 43.82 annual circuit-status report provides enough information so that the circuit-addition report is no longer necessary. Section 63.23(e) required carriers that have been certified to resell international private lines for the provision of

telecommunications services to file each year the number of private line circuits they added and the service for which they were used. The Commission required this report because such service provider did not file the annual circuit-status report. The underlying carriers that provide the private lines that the resellers are using are required to report those circuits in their annual circuit-status report. As a result, we have a record that the circuits are used and do not need for the resellers also to report the same circuits.

Needs and Uses: The rules adopted in the Open Internet Order establish a formal complaint process to address open Internet disputes that cannot be resolved through other means, including the Commission's informal complaint system. This process will permit anyone—including individual end users and edge providers—to file a claim alleging that another party has violated a rule, and asking the Commission to rule on the dispute. The formal complaint rules will facilitate prompt and effective enforcement of the rules adopted in the Open Internet Order, which is crucial to preserving an open Internet and providing clear guidance to stakeholders.

OMB Control Number: 3060–1158.

OMB Approval Date: September 9, 2011.

OMB Expiration Date: September 30, 2014.

Title: Disclosure of Network Management Practices, Preserving the Open Internet and Broadband Industry Practices, Report and Order, GN Docket No. 09–191 and WC Docket No. 07–52.

Form Number: N/A.

Estimated Annual Burden: 1,477 respondents; 1,477 responses; 32 hours per response (average); 47,264 burden hours per year; total annual cost burden \$471,600.

Nature and Extent of Confidentiality: None.

Needs and Uses: The rules adopted in the Open Internet Order require all

providers of broadband Internet access service to publicly disclose accurate information regarding the network management practices, performance, and commercial terms of their broadband Internet access services sufficient for consumers to make informed choices regarding use of such services and for content, application, service, and device providers to develop, market, and maintain Internet offerings. The rules ensure transparency and continued Internet openness, while making clear that broadband providers can manage their networks effectively. The Commission anticipates that due to the extent and nature of their services small entities may have less of a burden and larger entities may have more of a burden than the average compliance burden.
