*Title:* Qualified Product List for Wild Land Fire Chemicals.

OMB Control Number: 0596-0182. Summary of Collection: The Forest Service and cooperating wildland firefighting agencies need adequate types and quantities of qualified fire chemical products available to accomplish fire management activities as safely and effectively as possible. To accomplish this objective, the Agency evaluates and pre-approves commercial wildland firefighting chemicals. The Agency is required to submit the formulations to the U.S. Fish and Wildlife Service and National Oceanic Atmospheric Administration Fisheries during the evaluation process. All products must meet the requirements of specifications identified and maintained by the Wildland Fire Chemical Systems (WFCS) staff at the National Technology & Development Program (Missoula). After a product evaluation has been completed successfully, the product is

added to the Qualified Products List (QPL) for the appropriate product type. All Federal procurements of wildland fire chemicals are made from these lists.

Need and Use of the Information: The collection of this information for each product submission is necessary due to the length of time needed to test the product (16 to 18 months) and the need to ensure that products do not pose a hazard for laboratory personnel during the evaluation prior to purchase and use. This information collection and the product evaluation must be conducted on an ongoing basis to ensure the Agency can solicit and award contracts in a timely manner to provide firefighters with safe and effective wildland fire chemical products.
