**Western Pacific Fisheries; 2012 Annual Catch Limits and Accountability Measures**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

**ACTION:** Final specifications.

**SUMMARY:** In this rule, NMFS specifies annual catch limits for western Pacific bottomfish, crustacean, precious coral, and coral reef ecosystem fisheries, and accountability measures to correct or mitigate any overages of catch limits. The catch limits and accountability measures support the long-term sustainability of fishery resources of the U.S. Pacific Islands.

**DATES:** The final specifications are effective March 8, 2012 through December 31, 2012.

**ADDRESSES:** Copies of the fishery ecosystem plans are available from the

Western Pacific Fishery Management Council (Council), 1164 Bishop St., Suite 1400, Honolulu, HI 96813, tel. (808) 522–8220, fax (808) 522–8226, or [www.wpcouncil.org](http://www.wpcouncil.org). Copies of the environmental assessments and findings of no significant impact for this action are available from [www.regulations.gov](http://www.regulations.gov), or Michael D. Tosatto, Regional Administrator, NMFS Pacific Islands Region (PIR), 1601 Kapiolani Blvd., 1110, Honolulu, HI 96814.

**FOR FURTHER INFORMATION CONTACT:** Jarad Makaiau, NMFS PIR Sustainable Fisheries, (808) 944–2108.

**SUPPLEMENTARY INFORMATION:** On January 3, 2012, NMFS published a request for public comments (77 FR 66) on proposed specifications that are finalized here. Additional background information on this action is found in the preamble to the proposed specifications, and is not repeated here.

Through this action, NMFS specifies annual catch limits (ACLs) and accountability measures (AM) for bottomfish, crustacean, precious coral, and coral reef ecosystem fishery management unit species (MUS) in the U.S. Exclusive Economic Zone (EEZ, generally 3–200 nm from shore) around American Samoa, Guam, the Commonwealth of the Northern Mariana Islands (CNMI), and Hawaii. The ACLs are specified for the 2012 fishing year, which begins on January 1 and ends on December 31, except for precious coral

fisheries, which began on July 1, 2011, and end on June 30, 2012.

NMFS is not specifying ACLs at this time for bottomfish, crustacean, precious coral, or coral reef ecosystem MUS in the Pacific Remote Island Areas, because commercial fishing is prohibited out to 50 nautical miles by Presidential Proclamation 8336 (establishing the Pacific Remote Island Marine National Monument (74 FR 1565, January 12, 2009)), and because there is no habitat to support such fisheries in the EEZ beyond the monument boundaries. The Council is separately working on a draft amendment to the relevant FEP containing fishery management measures for the Pacific Remote Islands Marine National Monument (as well as the Rose Atoll and Mariana Trench Marine National Monuments). Additionally, NMFS is not specifying ACLs for MUS that are currently subject to Federal fishing moratoria or prohibitions. These include all species of gold coral (73 FR 47098, August 13, 2008), all species of deepwater precious corals at the Westpac Bed Refugia (75 FR 2198, January 14, 2010), and the three Hawaii seamount groundfish: pelagic armorhead, alfonsin, and raftfish (75 FR 69015, November 10, 2010). The current prohibitions on fishing for these MUS serve as a functional equivalent of an ACL of zero.

NMFS and the Council, relying on information from local resource management agencies in American Samoa, Guam, the CNMI, and Hawaii, will conduct a post-season accounting of the annual catch for each stock and stock complex immediately after the end of the fishing year. If an ACL is exceeded, the Council will take action in accordance with 50 CFR 600.310(g), which may include a recommendation that NMFS reduce the ACL for the subsequent fishing year by the amount of the overage, or other measure, as appropriate.

**Comments and Responses**

The comment period for the proposed specifications ended on January 18, 2012. NMFS received no comments, and

so is adopting the specifications unchanged from the proposal.

**Changes From the Proposed Specifications**

There are no changes in the final specifications.

**Classification**

The Regional Administrator, NMFS PIR, determined that this action is necessary for the conservation and management of Pacific Islands fishery resources, and that it is consistent with the Magnuson-Stevens Fishery Conservation and Management Act and other applicable laws.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed specification stage that

this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed specifications and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required, and none was prepared.

This action is exempt from review under Executive Order 12866.
