complete the required information such as marking the corners of the lands applied for, and requesting/completing a cadastral survey of the lands. BLM estimates that we receive 732 applications annually, with a total annual burden of 20,496 hours. The respondents are Alaskan Native Vietnam Era Veterans. The frequency of response is once for each applicant.

SUPPLEMENTARY INFORMATION: 5 CFR 1320.12(a) requires that we provide a 60-day notice in the **Federal Register** concerning a collection of information to solicit comments on:

(a) Whether the collection of information is necessary for the proper functioning of the agency, including whether the information will have practical utility;

Under the General Mining Law (30 U.S.C. 29, 30, and 39), we grant the opportunity to obtain legal title (patent) to the land of those who explore for and locate valuable mineral deposits on the public domain lands. BLM implements the patent process under regulations 43 CFR 3860. Under 43 CFR 3870, any rival claimant with overlapping claims to the land applied for or anyone challenging BLM to issue the patent based on failure to follow the law or regulations must file with BLM certain required statements and evidence supporting the challenge or we will statutorily dismiss the challenge. The implementing

regulations require a patent applicant to provide the following information:

(1) Mineral survey application. Under 43 CFR Subpart 3861, the holder of a claim must submit to BLM a mineral survey for all lode claims, most mill sites, and placer claims located upon surveyed public lands, as a requisite to apply for a patent. BLM uses Form 3860-5 to collect the mining claim or site recording, chain-of-title, and geographic location information so that we can authorize a Deputy U.S. Mineral Surveyor to survey the claims or sites.

(2) Mineral patent application. Under 43 CFR 3862, 3863, and 3864, a mineral patent applicant must file certain proofs of ownership to demonstrate clear title to the claim(s) or millsite(s), bonafide of development, and the existence of a commercial mineral deposit subject to the General Mining Law of 1872, as amended. BLM used Form 3860-2 for title verification until Congress implemented a moratorium on new mineral patent applications.

Based on BLM's experience administering the General Mining Law, we estimate the public reporting burden to complete Form 3860-5 is one hour and for adverse claims or protests it is two hours. BLM estimates that we receive 30 mineral survey applications and 10 protests annually, with a total annual burden of 50 hours. The respondents are owners of unpatented mining claims and mill sites upon the public lands, reserved mineral lands of the United States, National Forests, and National Parks. The frequency of response is once for each mineral survey, each application for patent, and each filing of a protest or adverse claim. Since October 1, 1994, Congress has passed an annual moratorium which prevents the BLM for processing mineral patent applications unless the applications were grandfathered under the initial legislation. This moratorium does not affect mineral surveys, contests, or protests to existing mineral patent applications.

Any member of the public may request and obtain, without charge, a copy of BLM Form 3860-5 by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**.

BLM will summarize all responses to this notice and include them in the request for OMB approval. All comments will become a matter of a public record.
