Notice of Availability of a Draft Environmental Impact Statement for the Bering Sea and Aleutian Islands Halibut Abundance-Based Management of Amendment 80 Prohibited Species Catch Limit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of a draft environmental impact statement (DEIS); request for comments.

SUMMARY: This DEIS is prepared pursuant to the National Environmental Policy Act (NEPA) to assess the environmental impacts from alternatives associated with a proposed management measure to link the Pacific halibut (*Hippoglossus stenolepis*) prohibited species catch (PSC) limit for the Amendment 80 commercial groundfish trawl fleet in the Bering Sea and Aleutian Islands (BSAI) groundfish fisheries to halibut abundance. The objectives of linking the PSC limit are to minimize halibut PSC to the extent practicable under National Standard 9 of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and to achieve optimum yield in the BSAI groundfish fisheries on a continuing basis under National Standard 1. The action would also be expected to provide incentives for the Amendment 80 fleet to minimize halibut mortality at all times. Achievement of these objectives could result in additional harvest opportunities in the commercial halibut fishery.

DATES: Comments must be received on or before October 25, 2021.

ADDRESSES: You may submit comments, identified by NOAA-NMFS-2021-0074, by any of the following methods:
