

VI. Regulatory Impact Statement

A. Overall Impact

We have examined the impacts of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review) and the Regulatory Flexibility Act (RFA) (September 19, 1980 Pub. L. 96-354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more annually). This interim final rule is not a major rule. It does not have any cost or savings impact as it merely recertifies the existing 59 OPOs and does not introduce any new requirements.

The RFA requires agencies to analyze options for regulatory relief of small businesses. For purposes of the RFA, small entities include small businesses, nonprofit organizations and government agencies. Most hospitals and most other providers and suppliers are small entities, either by nonprofit status or by having revenues of \$25 million or less annually. For purposes of the RFA, all OPOs are considered to be small entities. Individuals and States are not included in the definition of a small entity.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 100 beds.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule that may result in expenditure in anyone year by State, local, or tribal governments, in the aggregate, or by the private sector, of \$110 million. This rule will not have an effect on the governments mentioned, nor does it have associated private sector costs. This rule does not have any cost or savings impact as it extends the time period for payments under existing agreements and does not introduce any new requirements.

According to section 1138 of the Social Security Act, an OPO must be certified or recertified by the Secretary as meeting the standards to be a qualified OPO, must meet performance-related standards prescribed by the Secretary, and must be designated by the Secretary as an OPO in order to receive reimbursement under title XVIII or title XIX. Because section 273(b)(1)(D)(i) would terminate certifications after January 1, 2002, we are issuing this interim final rule to permit all 59 OPOs to continue to function, procure organs and obtain appropriate reimbursement.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. As stated previously, this rule does not have a substantial effect on State or local governments.

B. Conclusion

For these reasons, we are not preparing analyses for either the RFA or section 1102(b) of the Act because we have determined, and we certify, that this rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this regulation was reviewed by the Office of Management and Budget.
