SUPPLEMENTARY INFORMATION:

Introduction

With this notice, we announce the completion of the CCP process for the Willamette Valley National Wildlife Refuges. The Service started this process through a notice of intent in the **Federal Register** (73 FR 11137; February 29, 2008). We released the draft CCP/EA to the public, announcing and requesting comments in a notice of availability in

the **Federal Register** (76 FR 30382; May 25, 2011).

The Willamette Valley National Wildlife Refuge Complex includes three refuges: William L. Finley, Baskett Slough, and Ankeny. Together, the three refuges encompass approximately 11,110 acres in western Oregon. Habitats on the refuges include seasonal, semipermanent, and permanent wetlands; wet prairies, upland prairie/oak savannas, oak woodlands, mixed deciduous-coniferous forests, riparian, riverine, and stream habitats. Agricultural lands, the majority managed as grass fields, are also present on the refuges. The refuges were established under the Migratory Bird Conservation Act "for use as an inviolate sanctuary or for any other management purpose, for migratory birds * * * to conserve and protect migratory birds * * * and to restore or develop adequate wildlife habitat," with emphasis on protecting dusky Canada geese. In the last four decades, these refuges have provided not only an important wintering grounds for the dusky Canada goose and thousands of other wintering geese and ducks, but also have been recognized more recently as increasingly important areas for conservation of the remaining fragments of the native Willamette Valley habitats and biota. The refuges support key populations of federally listed species, including Oregon chub, Fender's blue butterfly, Bradshaw's desert-parsley, Kincaid's lupine, Nelson's checker-mallow, and Willamette daisy, and provide migration habitat for listed Chinook salmon and steelhead. Several other rare species are also found on the refuges.

We announce our CCP decision and the availability of a FONSI for the final EA for Willamette Valley NWRs in accordance with the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd-668ee) (Refuge Administration Act) and National Environmental Policy Act (NEPA) (40 CFR 1506.6(b)) requirements. We prepared an analysis of environmental impacts, which we included in an EA that accompanied the draft CCP.

The CCP will guide us in managing and administering the refuges for the next 15 years. Alternative 2, as described in the draft CCP, is the basis of the final CCP.

Background

The Refuge Administration Act, as amended by the National Wildlife Refuge System Improvement Act of 1997, requires us to develop a CCP for each national wildlife refuge. The purpose for developing a CCP is to
