

possession limit of Permit Category A and C vessels fishing in the SFMA. This was deemed a reasonable approximation because it is reflective of how the standard monkfish commercial fishery operates. Further, it is likely that RSA grant recipients would optimize their RSA DAS award by utilizing this possession limit.

Prior to the submission of SMAST's RSA proposal, Amendment 5 to the Monkfish FMP was implemented. This adjusted the tail-to-whole-weight conversion factor from 3.32 to 2.91, which essentially reduced the whole weight possession limits. However, SMAST has noted that, because its RSA proposal and budget were developed in a manner that was consistent with previously approved EFPs, the request is justified. Therefore, if approved, participating vessels could use up to 129 DAS, or up to 464,400 lb (210,648.3 kg) of whole monkfish under the EFP, whichever limit is reached first.

If approved, the applicant may request minor modifications and extensions to the EFP throughout the year. EFP modifications and extensions may be granted without further notice if they are deemed essential to facilitate completion of the proposed research and have minimal impacts that do not change the scope or impact of the initially approved EFP request. Any fishing activity conducted outside the scope of the exempted fishing activity would be prohibited.
