*Total Annual Cost:* \$1,911,540.

*Privacy Act Impact Assessment:* No impact(s).

*Nature and Extent of Confidentiality:* There is no need for confidentiality with this collection of information.

*Needs and Uses:* The Commission is obligated by statute to promote “safety of life and property” and to “encourage and facilitate the prompt deployment throughout the United States of a seamless, ubiquitous, and reliable end-to-end infrastructure” for public safety. Congress has established 911 as the national emergency number to enable all citizens to reach emergency services directly and efficiently, irrespective of whether a citizen uses wireline or wireless technology when calling for help by dialing 911. Efforts by federal, state and local government, along with the significant efforts of wireline and

wireless service providers, have resulted in the nearly ubiquitous deployment of this life-saving service.

Section 506 of RAY BAUM’S Act requires the Commission to “consider adopting rules to ensure that the dispatchable location is conveyed with a 9–1–1 call, regardless of the technological platform used and including with calls from multi-line telephone system.” RAY BAUM’S Act also states that, “[i]n conducting the proceeding . . . the Commission may consider information and conclusions from other Commission proceedings regarding the accuracy of the dispatchable location for a 9–1–1 call . . . .” RAY BAUM’S Act defines a “9–1–1 call” as a voice call that is placed, or a message that is sent by other means of communication, to a Public Safety Answering Point (PSAP) for the purpose of requesting emergency services.

As part of implementing Section 506 of RAY BAUM’S Act, on August 1, 2019, the Commission adopted a *Report and Order (2019 Order)*, set forth rules requiring Fixed Telephony providers and MLTS providers to ensure that dispatchable location is conveyed with 911 calls.

The Commission’s *2019 Order* adopted §§ 9.8(a) and 9.16(b)(3)(i), (ii), and (iii) to facilitate the provision of automated dispatchable location. For Fixed Telephony and in fixed Multi-line Telephone Systems (MLTS) environments, respective providers must provide automated dispatchable location with 911 calls. For on-premises, non-fixed devices associated with an MLTS, the MLTS operator or manager must provide automated dispatchable location to the appropriate PSAP when technically feasible; otherwise they must provide either dispatchable location based on end-user

manual update, or alternative location information. For off-premises MLTS calls to 911, the MLTS operator or manager must provide (1) dispatchable location, if technically feasible, or, otherwise, either (2) manually-updated dispatchable location, or (3) enhanced location information, which may be coordinate-based, consisting of the best available location that can be obtained from any available technology or combination of technologies at reasonable cost. The requirements adopted in the *2019 Order* account for variance in the feasibility of providing dispatchable location for non-fixed MLTS 911 calls, and the means available to provide it. The information collection requirements associated with these rules will ensure that Fixed Telephony and MLTS providers have the means to provide 911 callers’ locations to PSAPs, thus reducing response times for emergency services.
