Title: Lead-Based Paint Pre-Renovation Information Dissemination—TSCA Sec. 406(b).

Abstract: This information collection involves third-party notification to owners and occupants of housing that will allow these individuals to avoid exposure to lead-contaminated dust and lead-based paint debris that are sometimes generated during renovations of housing where lead-based paint is present, thereby protecting public health. Since young children are especially susceptible to the hazards of lead, owners and occupants with children can take action to protect their children from lead poisonings. Section 406(b) of the Toxic Substances Control Act (TSCA) requires EPA to promulgate regulations requiring certain persons who perform renovations of target housing for compensation to provide a lead hazard information pamphlet (developed under TSCA section 406(a)) to the owner and occupants of such housing prior to beginning the renovation. Those who fail to provide the pamphlet as required may be subject to both civil and criminal sanctions.

Responses to the collection of information are mandatory (see 40 CFR part 745, subpart E). Respondents may claim all or part of a notice as CBI. EPA will disclose information that is covered by a CBI claim only to the extent permitted by, and in accordance with, the procedures in 40 CFR part 2.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register**, are listed in 40 CFR part 9 and included on the related collection instrument or form, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average about one and a half hours per response. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Persons who perform renovations of certain types of housing, constructed prior to 1978, for compensation.

Frequency of Collection: On occasion.
Estimated No. of Respondents: 2,482,000.

Estimated Total Annual Burden on Respondents: 3,461,542 hours.

Estimated Total Annual Costs: \$111,929,595.

Changes in Burden Estimates: This request reflects an increase of 522,996 hours (from 2,938,546 hours to 3,461,542 hours) in the total estimated respondent burden from that currently in the OMB inventory. This increase is due to an increase in the estimated number of annual renovation events, as detailed in the Supporting Statement for this ICR. The increased number of renovation events is the result of increased spending on renovations and reflects a general economic trend. The change in burden represents an adjustment.
