The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments regarding (a) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by September 18, 2014 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725–17th Street NW., Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: OIRA_Submission@OMB.EOP.GOV or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

Animal & Plant Health Inspection Service

Title: Gypsy Moth Identification Worksheet.

OMB Control Number: 0579–0104.

Summary Of Collection: Under the Plant Protection Act (7 U.S.C. 7701 – *et seq.*), the Secretary of Agriculture either independently or in cooperation with the States, is authorized to carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pest new to the United States or not widely distributed throughout the United States. The Plant Protection and Quarantine (PPQ), a program within the Animal and Plant Health Inspection Service (APHIS), is responsible for implementing the intent of this Act, and does so through the enforcement of its Domestic Quarantine Regulations contained in Title 7 of the Code of Federal Regulations (CFR) Part 301. The European gypsy moth is one of the most destructive pests of fruit and ornamental trees as well as hardwood forests. The Asian gypsy moth is an exotic strain of gypsy moth that is closely related to the European variety already established in the U.S. Due to significant behavioral differences, this strain is considered to pose an even greater threat to trees and forested areas. In order to determine the presence and extent of a European gypsy moth or an Asian gypsy moth infestation, APHIS sets traps in high-risk areas to collect specimens.

Need And Use Of The Information: APHIS will collect information from the Gypsy Moth Identification Worksheet, PPQ Form 305, to identify and track specific specimens that are sent to the Otis Development Center for identification tests based on DNA analysis. This information collected is vital to APHIS' ability to monitor, detect, and eradicate gypsy moth infestations and the worksheet is completed only when traps are found to contain specimens. Information on the worksheet includes the name of the submitter, the submitter's agency, the date collected, the trap number, the trap's location (including the nearest

port of entry), the number of specimens in the trap, and the date the specimen was sent to the laboratory.

APHIS will also use the Your Move Gypsy Moth Free Brochure-Program Aid No. 2147 to collect information on required inspection of outdoor household articles that are to be moved from a gypsy moth quarantined area to a non-quarantined area to ensure that they are free of all life stages of gypsy moth.

Description of Respondents:

Individuals or households; State, Local or Tribal Government.

Number of Respondents: 200,120.

Frequency of Responses:

Recordkeeping; Reporting; On occasion.

Total Burden Hours: 216,600.

SUPPLEMENTARY INFORMATION:

Title: Organic Survey.

OMB Control Number: 0535–0249.

Expiration Date of Previous Approval: July 31, 2014.

Type of Request: To revise and extend a currently approved information collection for a period of three years.

Abstract: The primary objective of the National Agricultural Statistics Service (NASS) is to prepare and issue State and national estimates of crop and livestock production, prices, and disposition as well as economic statistics, farm numbers, land values, on-farm pesticide usage, pest crop management practices, as well as the Census of Agriculture.

This is a resubmission of the **Federal Register** Notice to include several changes to the survey that were not included in the original notice. The original notice was published on March 17, 2014.

In 2009, NASS conducted the 2008 Organic Production Survey (OMB #0535–0249). This was originally designed to be conducted once every five years as a mandatory, follow-on survey to the 2007 Census of Agriculture. In 2011, when the docket was renewed, it was changed to accommodate a formal agreement with the USDA Risk Management Agency (RMA). Specifically, the survey was changed to a voluntary survey that was to be conducted annually if funding permitted, and it would allow for a rotation of target crops each year. With the completion of the 2012 Census of Agriculture, NASS proposes to expand the scope of the Organic Production Survey questionnaire to include questions that are needed for the 5-year Census of Agriculture data series using funding provided through the Census of Agriculture program. Accordingly, NASS proposes to restore mandatory reporting to the Organic Survey. The

name of this docket will be changed to Organic Survey. This survey will only be conducted once under this approval; the data reference year will be 2014, and data will be collected in 2015.

The sample will consist of all farm operators from the 2012 Census of Agriculture who reported they produce organically certified crops and/or livestock, were exempt from certification (i.e., they produce less than \$5,000 in sales per year), and those who were in the process of transitioning over to being organic farmers. The survey will be conducted in all States. Some operation level data will be collected to use in classifying each operation for summary purposes. The majority of the questions will involve production data (acres planted, acres harvested, quantity harvested, quantity sold, livestock produced and sold, value of sale, etc.), production expenses, and marketing and production practices.

Approximately 14,000 operations will be contacted by mail in early January 2015, with a second mailing later in the month to non-respondents. Respondents will be able to complete the questionnaire by use of the internet, if they so choose. Telephone and personal enumeration will be used for remaining non-response follow-up. The National Agricultural Statistics Service will publish summaries in October 2015 at both the State level and for each major organic commodity when possible. Due to confidentiality rules, some State level data may be combined and published at the regional or national level to prevent disclosure of individual operation's data. This collection of data will support requirements within the Agricultural Act of 2014. Under Section 11023 some of the duties of the Federal Crop Insurance Corporation (FCIC) are defined as “(i) IN GENERAL—As soon as possible, but not later than the 2015 reinsurance year, the Corporation shall offer producers of organic crops price elections for all organic crops produced in compliance with standards issued by the Department of Agriculture under the national organic program established under the Organic Foods Production Act of 1990 (7 U.S.C. 6501 et seq.) that reflect the actual retail or wholesale prices, as appropriate, received by producers for organic crops, as determined by the Secretary using all relevant sources of information. “(ii) ANNUAL REPORT.—The Corporation shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate an annual report on progress made in developing and improving Federal crop insurance for organic

crops, including—“(I) the numbers and varieties of organic crops insured; “(II) the progress of implementing the price elections required under this subparagraph, including the rate at which additional price elections are adopted for organic crops; “(III) the development of new insurance approaches relevant to organic producers; and “(IV) any recommendations the Corporation considers appropriate to improve Federal crop insurance coverage for organic crops”.

Authority: This census of organic farmers is required by law under the “Census of Agriculture Act of 1997,” Public Law 105–113, 7 U.S.C. 2204(g) as amended. These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork Reduction Act of 1995, Public Law. 104–13 (44 U.S.C. 3501, et seq.) and Office of Management and Budget regulations at 5 CFR part 1320.

NASS also complies with OMB Implementation Guidance, “Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical Efficiency Act of 2002 (CIPSEA),” **Federal Register**, Vol. 72, No. 115, June 15, 2007, p. 33362.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 45 minutes per response.

Respondents: Farmers and Ranchers.

Estimated Number of Respondents: 14,000.

Estimated Total Annual Burden on Respondents: 11,000 hours (based on an estimated 80% response rate, using 2 mail attempts, followed by phone and personal enumeration for non-respondents).

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, technological or other forms of

information technology collection methods.

All responses to this notice will become a matter of public record and be summarized in the request for OMB approval.

Signed at Washington, DC, August 11, 2014.

R. Renee Picanso,

Associate Administrator.
