

DTV channel *58 as WCMV-DT paired DTV allotment; and the substitution of DTV channel *58 for DTV channel *17 as WCMV-DT's paired DTV allotment. DTV Channel *17 can be allotted to Cadillac in compliance with the principle community coverage requirements of Section 73.625(a) at reference coordinates 44-44-53 N. and 85-04-08 W. with a power of 500 and a height above average terrain (HAAT) of 399 meters. DTV channel *58 can be allotted to Manistee in compliance with the principle community coverage requirements of Section 73.625(a) at reference coordinates 44-03-57 N. and 86-19-58 W. with a power of 200 and a height above average terrain (HAAT) of 104 meters. Since the communities of Cadillac and Manistee are located within 400 kilometers of the U.S.-Canadian border, concurrence from the Canadian government must be obtained for these allotments.

Automotive Fuel Economy Manufacturing Incentives for Alternative Fuel Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: To provide an incentive for the production of vehicles that can operate on certain alternative fuels as well as on regular petroleum fuels, Congress established a special procedure for calculating the fuel economy of those vehicles for the purpose of determining compliance with the Corporate Average Fuel Economy standards. This procedure increases the fuel economy attributed to such “dual-fueled” vehicles, thus facilitating compliance with those standards. By statute, the incentive is available through the end of the 2004 model year and may be extended by up to four additional years through rulemaking.

This document proposes to extend the availability of the incentive by four years, i.e., through the end of the 2008 model year.

DATES: Comments must be received on or before April 10, 2002.

ADDRESSES: You may submit your comments in writing to: Docket Section, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590.

I. Summary of Agency Proposal

Congress created the Corporate Average Fuel Economy (CAFE) program when it enacted the Energy Policy and Conservation Act of 1975 (Pub. L. 94–163; Dec. 22, 1975). The CAFE statutory provisions, now codified in Chapter 329 of Title 49 of the United States Code (49

U.S.C. 32901 *et seq.*), mandate fuel economy standards that must be met by vehicle manufacturers. These standards apply separately to each manufacturer’s annual fleet of passenger cars and to its annual fleet of light trucks under 8,500 lbs. gross vehicle weight rating, instead of applying to individual vehicles. Each manufacturer’s average fuel economy is determined by the Environmental Protection Agency in accordance with procedures set forth in 49 U.S.C. 32904. Those procedures provide for determining the fuel economy of a manufacturer’s model types produced in a particular model year and calculating a weighted fuel economy average for the manufacturer.

Congress amended the CAFE provisions when it enacted the Alternative Motor Fuels Act of 1988 (“AMFA”) (Pub. L. 100–94; October 14, 1988). The purposes of AMFA were to encourage the development and use of methanol, ethanol and natural gas as transportation fuels and to promote the production of alternative fuel vehicles (AFVs). For the latter purpose, AMFA provides special procedures for calculating the fuel economy of “dedicated” alternative fuel vehicles and “dual-fueled” vehicles that meet specified eligibility criteria. “Dedicated vehicles” are cars or light trucks designed to operate exclusively either on natural gas or on a methanol or ethanol fuel mixture composed of at least 85 percent of either substance. “Dual-fueled vehicles” have the capability to operate on conventional petroleum and the capability to operate on an alternative fuel. Most dual-fueled vehicles produced to date are capable of operating on E85 (a blend of 85 percent ethanol and 15 percent gasoline) and either gasoline or diesel. The special calculation procedures used in determining the fuel economy of alternative fuel vehicles substantially increase the fuel economy ratings of these vehicles.

In creating the incentive program for dual-fueled vehicles, Congress expressly limited both the extent to which a manufacturer can avail itself of the incentive in any model year as well as the duration of the incentives.¹ For the 1993–2004 model years, the maximum increase in CAFE available to a manufacturer for producing qualifying dual-fueled vehicles is 1.2 miles per gallon.

AMFA provides that by December 31, 2001, the agency either extend the program beyond the 2004 model year or

¹ Congress did not apply either of these limitations to the incentive program for dedicated vehicles.
