

above. During the onsite interviews, several ODOT staff members agreed that it could be beneficial to develop a written procedure to establish expectations and memorialize ODOT's re-evaluation process in compliance with Federal requirements. The team also made note that in ODOT's Self-Assessment, several ODOT districts requested development of re-evaluation guidance. Based on these concerns, the team supports consideration of the development of written procedures and guidance for the re-evaluation of EAs and EISs to reduce risk to ODOT's program.

Quality Assurance/Quality Control (QA/QC)

Observation 4: Opportunities exist to improve QA/QC procedures relevant to c-listed CE documentation.

The ODOT NEPA Quality Control and Quality Assurance Processes and Procedures, dated April 6, 2017, indicates d-listed CEs (D2 and D3 actions per ODOT's CE guidance), EAs, and EISs will be peer reviewed by OES staff and c-listed and d-listed CEs (D1 actions per ODOT's guidance) will be reviewed by district environmental staff prior to review and approval by the DEC. The team learned through all four audits that district staff have their own methods of conducting reviews which may lead to inconsistencies across the districts in the review of c-listed projects. EnviroNet provides some programmed QA/QC. The system itself does not identify missing support documentation under the project file tab, or mistakes in data entry into the system, which comprise most of the errors found by both FHWA and ODOT's Self-Assessment. A more robust QA/QC process for c-level projects could reduce risk and improve efficiency in ODOT's program. In addition, there is no stand-alone QA/QC training to train ODOT personnel per ODOT's expectations and guidance.

Legal Sufficiency Review

The ODOT did not have any documents that required legal sufficiency reviews during the Audit #4 timeframe; therefore, the team had no observations related to legal sufficiency.

Performance Measures

The MOU Section 10.2 requires the development of performance measures. The ODOT has refined its performance measures to provide a better overall indication of ODOT's execution of its responsibilities as assigned by the MOU. The team found evidence that the results obtained through the performance measures are allowing

ODOT to make appropriate changes as it manages its environmental program. The team had no observations related to performance measures.

Training Program

Previous audits noted that ODOT had a robust environmental training program and provided adequate budget and time for staff to access a variety of internal and external training. The ODOT continues to enhance its traditional training program and plan with the development of additional online courses. The ODOT currently offers 28 online trainings for free to ODOT staff, consultants, LPAs, partner agencies, and anyone else who desires to take them. The ODOT utilizes the Ohio's Local Technical Assistance Program to manage the courses. This free online training makes training more accessible to a greater number of staff and consultants and allows consistent, self-paced, and individualized training. Also, the previous audit noted ODOT's training plan required environmental consultants to take the pre-qualification training courses and all ODOT environmental staff (both central and district offices) take all environmental courses.

The team encourages ODOT to broaden its training program and training collaboration with other Federal agencies and environmental organizations. The team commends ODOT for its efforts in taking external ecological and cultural resource courses, but feels there is room for improvement exploring external human environment training. During the interviews, ODOT staff noted they are reluctant to take National Highway Institute training courses because of their broad perspective; however, they did express interest in taking specialized FHWA training that focus on specific topics such as the recently offered FHWA Resource Center Air Quality Workshop. The ODOT also expressed interest in getting assistance from FHWA to develop training case studies that were relevant to its transportation program, which the audit team supports. The team had no observations related to training.

Finalization of Report

The FHWA published a notice in the **Federal Register** on June 17, 2020, at 85 FR 36661, soliciting public comment for 30 days on the draft fourth audit report. The FHWA received comments on the draft report from the American Road and Transportation Builders Association (ARTBA) and ODOT. The ARTBA's comments supported the Surface Transportation Project Delivery Program

and did not relate specifically to Audit #4. The comments submitted by ODOT on the draft audit report were substantially similar to comments that had previously been discussed by the Audit Team with ODOT during the development of the audit report. The FHWA considered these comments during the audit process and determined they did not warrant changes to FHWA's observations. This final report is substantively the same as the draft version. The FHWA looks forward to continuing to work collaboratively with ODOT during the monitoring phase of the program.
