Nonmetallic Thermal Insulation for Austenitic Stainless Steel

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG-1312, "Nonmetallic Thermal Insulation for Austenitic Stainless Steel," also known as Regulatory Guide (RG) 1.36. The NRC is proposing to revise the guidance to reflect the most current versions of voluntary consensus standards since the initial publication of RG 1.36 in February 1973. The guide describes methods and procedures that the staff of the NRC considers acceptable when selecting and using nonmetallic thermal insulation in the stainless steel portions of the reactor coolant pressure boundary and other systems, in order to minimize any contamination that could promote stress-corrosion cracking. This RG applies to light-water-cooled reactors.

DATES: Submit comments by November 5, 2014. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.
