#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for a revision and extension of a currently approved information collection.

The Endangered Species Act of 1973 (ESA; 16 U.S.C. 1531 *et seq.*) imposed prohibitions against the taking of endangered species. Section 10 of the ESA allows permits authorizing the taking of endangered species for research/enhancement purposes. The corresponding regulations established procedures for persons to apply for such permits. In addition, the regulations set forth specific reporting requirements for such permit holders. The regulations contain two sets of information collections: (1) Applications for research/enhancement permits, and (2) reporting requirements for permits issued.

The required information is used to evaluate the impacts of the proposed activity on endangered species, to make the determinations required by the ESA prior to issuing a permit, and to establish appropriate permit conditions. To issue permits under ESA Section 10(a)(1)(A), the National Marine Fisheries Service (NMFS) must determine that (1) Such exceptions were applied for in good faith, (2) if granted and exercised, will not operate to the disadvantage of such endangered species, and (3) will be consistent with the purposes and policy set forth in Section 2 of the ESA.

The currently approved application and reporting requirements are being revised to apply only to Pacific salmon and steelhead, as requirements regarding other species are being addressed in a separate information collection. Clarification of some of the instructions will also be provided, based on previous applicants' responses and submitted applications and reports.

##### II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include e-mail of electronic forms, and mail and facsimile transmission of paper forms, as well as some information by telephone.
