

concluded, the system would be shut down and removed.

The USCG proposes to use HF and UHF SONAR technology from mobile platforms nationwide. Mobile platforms include ships, boats, remotely operated vehicles (ROVs), and autonomous underwater vehicles (AUVs). Additionally, SONAR could be towed by a boat (*i.e.*, a torpedo-shaped "towfish"), lowered from a boat on a pole, or temporarily fixed to a pier or a pile. Impacts on the seafloor from ROV and AUV operations would not be significant. ROVs would be used pier-side or at a location appropriate for conducting vessel inspections. An appropriate location for inspection would be at a water depth that would preclude seafloor disturbance. As such, ROVs and AUVs would usually be suspended in the water column and would rarely contact the seafloor. Typically, ROVs and AUVs would be used in open, navigable waterways or safe anchorages. However, an ROV or AUV might contact the seafloor if there is a suspected threat on the seafloor that needs to be investigated; such contact would be short-term and transient in nature.

Although selected HF and UHF SONAR systems could be employed by any USCG unit to accomplish a mission, the USCG does not intend to permanently equip or outfit every USCG unit with SONAR capability. The HF and UHF SONAR systems selected could be powered using existing USCG power supplies such as public electrical distribution grids, shipboard electrical power, or portable generators (e.g., Honda 1,000-watt generator).

Scope of the Programmatic Environmental Assessment

The scope of the PEA focuses on potential impacts associated with the anticipated use of the HF and UHF SONAR systems to accomplish USCG mission activities. The PEA addresses potential impacts on living marine resources based on these operating criteria. Supplemental, follow-on NEPA documentation or additional consultations with appropriate resource authorities would be required if site-specific, non-mobile operating scenarios or newly developed technologies fall outside of the scope of this assessment. The scope of the PEA encompasses geographic locations where the systems are expected to operate.

The SONAR technology systems would be available for use by the USCG within all areas under USCG jurisdiction along the U.S. continental coastline, the Great Lakes, Hawaii, Alaska, United States territories, and

inland operating areas. The inland operating areas would include existing harbor infrastructure and adjacent inland waters, including the St. Lawrence Seaway, the Great Lakes, and western and inland river systems. The offshore operating areas would include areas up to 12 nautical miles offshore and most areas shoreward. Normal locations for deployments would include the ports and waterways of the nation's top tiered militarily and economically significant ports. Emergency use of HF and UHF SONAR technology during times of extreme weather, such as hurricanes, could be required for onshore areas that become inundated by floodwater.

Public input is important to the preparation of the Final PEA. Your concerns and comments regarding the nationwide use of HF and UHF active SONAR technology and the possible environmental impacts are important to the USCG, and we encourage you to share them with us.

SUPPLEMENTARY INFORMATION: This request for emergency processing is essential in order to implement the statutory changes to NAHASDA for fiscal year 2012. A standard PRA review would delay implementation of the revised IHP/APR until fiscal year 2013. The agency cannot reasonably comply with the normal clearance procedures under this part because the statutory changes accelerate the submission of the IHP. With implementation of the statutory changes, the IHP is due 75 days prior to the beginning of the grantee's fiscal year. For grantees with a fiscal year beginning October 1, 2011, the revised IHP will be due July 16, 2011, rather than July 1, 2012. The emergency clearance processing of the revised PRA is needed in order to provide IHBG recipients with sufficient time to complete the IHP prior to submission and provide training to all IHBG recipients on the revised form. Therefore, the use of the normal clearance procedures is reasonably likely to prevent or disrupt the collection of information and is reasonably likely to cause a statutory deadline to be missed.

Section 1605(b) provides that the Buy American requirement shall not apply in any case or category in which the head of a Federal department or agency finds that: (1) Applying the Buy American requirement would be inconsistent with the public interest; (2) iron, steel, and the relevant manufactured goods are not produced in the U.S. in sufficient and reasonably available quantities or of satisfactory quality, or (3) inclusion of iron, steel, and manufactured goods will increase the cost of the overall project by more than 25 percent. Section 1605(c) provides that if the head of a Federal department or agency makes a determination pursuant to section 1605(b), the head of the department or agency shall publish a detailed written justification in the **Federal Register**.
