This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218–0011.

The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. SUPPLEMENTARY INFORMATION:

Overview: The growth in scale, diversity, and complexity of data has increased the demand for understanding large amounts of heterogeneous data. This presents new challenges to the way data and information are used and managed. A need exists to understand ways to design systems for processing big data, develop sophisticated analytics using large-scale data, consider privacy issues arising from use of this massive data, and determine ways to teach big data analytics across disciplines. This workshop will bring together academic and industry leaders across disciplines to further inform the development of an effective Federal Big Data Research Agenda.

Background: Given the large number of overlapping data challenges many federal agencies are facing, a National Big Data R&D Initiative was launched in March 2012. As part of this Initiative, a Federal Big Data Research Agenda is under development. This workshop is part of the process to collect input from those in academia and industry that are working on big data research and new technologies.

The purpose of drafting a Federal Big Data Research Agenda is to assist Federal Agencies in planning their individual Big Data R&D programs and initiatives. The Agenda is expected to be released in late 2015.

Submitted by the National Science Foundation for the National Coordination Office (NCO) for Networking and Information Technology Research and Development (NITRD) on January 22, 2015.

Reports Clearance Officer, National Science Foundation.
