

CFR 351.214(i)(1) require the Department to issue the preliminary results of a new shipper review within 180 days after the date on which the new shipper review was initiated and the final results of a review within 90 days after the date on which the preliminary results were issued. The Department may, however, extend the deadline for completion of the final results of a new shipper review to 150 days if it determines that the case is extraordinarily complicated. *See* section 751(a)(2)(B)(iv) of the Act, and 19 CFR 351.214(i)(2).

The Department has determined that the review is extraordinarily complicated because of issues related to surrogate valuation and other calculation-related issues. In addition, based on the Department's extension of the briefing schedule and the additional information that must be analyzed, the final results of this new shipper review cannot be completed within the statutory time limit of 90 days. Accordingly, the Department is extending the time limit for the completion of the final results by 60 days until June 14, 2010, in accordance with section 751(a)(2)(B)(iv) of the Act and 19 CFR 351.214(i)(2).

This notice is issued and published in accordance with section 751(a)(1) of the Act and 19 CFR 351.214(i)(2).

Dated: March 19, 2010.

Permit No. 87-1743-05, issued on September 29, 2009 (74 FR 56999), authorized long-term behavioral, physiological, and life history research studies on northern elephant seals (*Mirounga angustirostris*) through September 30, 2010. This amendment (Permit No. 87-1743-06) authorizes the permit holder to increase the number of weaned pups weighed, measured, and tagged in order to study the effects of a current El Niño event. This amendment has been issued prior to close of the public comment period for the application (75 FR 13257), pursuant to 50 CFR 216.33(e)(6). NMFS has determined that the unique climate conditions related to an El Niño event represent a unique research opportunity to study climactic effects on northern elephant seals.

**SUPPLEMENTARY INFORMATION:** On November 18, 2009, notice was published in the **Federal Register** (74 FR 59524) that a request for a commercial/educational photography permit to take bottlenose dolphins (*Tursiops truncatus*) had been submitted by the above-named individual. The requested permit has been issued under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Mr. Pilley is authorized to film bottlenose dolphin strand feeding events in the estuaries and creeks of Bull Creek and around Hilton Head, SC. Filmmakers may use four filming platforms: a static remotely operated camera placed on the mudflats, a radio-controlled camera helicopter, a radio-controlled camera glider, and a radio-controlled camera boat. Up to 112 dolphins annually may be approached and filmed. Footage will be used to create a 6-part television series, "Earthflight," for the British Broadcasting Corporation and Discovery Channel.
