The third chart calculates the surcharges and fees incurred when an application, the search or examination fee, or the oath or declaration is filed late, when the application is filed with multiple dependent claims, or when the application is filed with a non-English

specification. The USPTO estimates that these fees apply to 111,231 of the 505,721 applications filed per year. This chart is a subset of the first chart and adds an additional \$13,876,905 to the annualized (non-hour) costs; however, it does not change the number of

responses. Except for the fee for the non-English specification, these fees are also determined by the filing status. Plant applications are not filed with multiple dependent claims so they are not included in this chart.
