The NRSP-7 Project, North Eastern Region, New York State College of Veterinary Medicine, Cornell University, Ithaca, NY 14850, has provided target animal safety, effectiveness, human food safety, and environmental data for use of oxytetracycline hydrochloride soluble powder for skeletal marking of fish by immersion. These data are contained in PMF 5667.

Under §§ 25.15(d) and 25.33(d)(4) (21 CFR 25.15(d) and 25.33(d)(4)), sponsors of NADAs and supplemental NADAs for drugs in minor species, including wildlife and endangered species, are categorically excluded from the requirement to prepare an environmental assessment or an environmental impact statement when the drug has been approved for use in another or the same species where similar animal management practices are used. The categorical exclusion applies unless, as defined in § 25.21 (21 CFR 25.21), extraordinary circumstances exist which indicate that the proposed action may significantly affect the quality of the human environment. Therefore, based upon information available, FDA agrees that when the application is submitted, the applicant may claim a categorical exclusion under § 25.33(d)(4) provided that the applicant can state that to the best of the applicant's knowledge, as in § 25.21, no extraordinary circumstances exist. It is assumed that the applicant has made a reasonable effort to determine that no extraordinary circumstances exist.
