SUPPLEMENTARY INFORMATION: The FEIS considers the effects of four management alternatives on the land and water resources at Elephant Butte and Caballo Reservoirs. The Multi-Purpose Emphasis Alternative, which provides for a variety of multiple uses including expanded developed recreation areas, improved primitive recreation areas, and designated wildlife management areas, has been selected as the preferred alternative. This alternative further identifies a course of action with minimal environmental impact, increased resource protection, and an acceptable level of recreational use. Under the selected alternative, grazing would continue based on extensive monitoring and confirmation of the capability of the resources to sustain grazing, a total of 378 lease lots would be privatized, additional wildlife management areas would be established, and selected recreation facilities would be expanded to accommodate future public recreation needs.

The Draft Environmental Impact Statement was issued September 24, 1999. Responses to comments received from interested organizations and individuals on the draft are addressed in the FEIS. No decision will be made on the proposed action until 30 days after release of the FEIS. After the 30-day waiting period, Reclamation will complete a Record of Decision. The Record of Decision will state the action that will be implemented and discuss all factors leading to that decision.

Dated: May 3, 2002.
