

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the time limit established under 19 CFR 351 expires. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, the Department may elect to specify a different time limit for extension requests for submissions which are due from multiple parties simultaneously. In such cases, we will inform parties of the time limit by issuing a letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. FOR FURTHER INFORMATION CONTACT:

Amy Hapeman, (301) 427-8401.

SUPPLEMENTARY INFORMATION: On July 29, 2015, notice was published in the **Federal Register** (80 FR 45204) that a modification of Permit No. 17183, issued April 24, 2013 (78 FR 26323), had been requested by the above-named individual. The requested modification has been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Permit No. 17183-01 authorizes Dr. Carthy to continue long-term research on the demographics and movements of green (*Chelonia mydas*), loggerhead (*Caretta caretta*), hawksbill (*Eretmochelys imbricata*), and Kemp's ridley (*Lepidochelys kempii*) sea turtles off the northwest coast of Florida. Researchers are authorized to capture sea turtles annually by hand or strike, tangle or dip net and have the following procedures performed before release: Measure; weigh; epibiota sample; biological sampling, marking; photograph. A subset of sea turtles also may be fitted with telemetry tags—either a satellite tag or an acoustic tag with an accelerometer. This modification (No. 2): (1) Increases the number of Kemp's ridley sea turtles captured annually; and (2) allows a larger subset of green and Kemp's ridley sea turtles to be tagged. The permit is valid through April 17, 2018.

Issuance of this modification, as required by the ESA was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of such endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: April 20, 2016.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
