BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket ID FEMA-2010-0003]

Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final rule.

SUMMARY: Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs are made final for the communities listed below. The BFEs and modified BFEs are the basis for the floodplain management measures that each community is required either to adopt or to show evidence of being

already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The date of issuance of the Flood Insurance Rate Map (FIRM) showing BFEs and modified BFEs for each community. This date may be obtained by contacting the office where the maps are available for inspection as indicated in the table below.

ADDRESSES: The final BFEs for each community are available for inspection at the office of the Chief Executive Officer of each community. The respective addresses are listed in the table below.

FOR FURTHER INFORMATION CONTACT: Roy E. Wright, Deputy Director, Risk Analysis Division, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street, SW., Washington, DC 20472, (202) 646-3461, or (e-mail) roy.e.wright@dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the modified BFEs for each community listed. These modified elevations have been published in newspapers of local circulation and ninety (90) days have elapsed since that

publication. The Deputy Federal Insurance and Mitigation Administrator has resolved any appeals resulting from this notification.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and FIRM available at the address cited below for each community. The BFEs and modified BFEs are made final in the communities listed below. Elevations at selected locations in each community are shown.

National Environmental Policy Act. This final rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. An environmental impact assessment has not been prepared.

Regulatory Flexibility Act. As flood elevation determinations are not within the scope of the Regulatory Flexibility Act, 5 U.S.C. 601-612, a regulatory flexibility analysis is not required.

Regulatory Classification. This final rule is not a significant regulatory action under the criteria of section 3(f) of

Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 13132, Federalism. This final rule involves no policies that have federalism implications under Executive Order 13132.

Executive Order 12988, Civil Justice Reform. This final rule meets the applicable standards of Executive Order 12988.

List of Subjects in 44 CFR Part 67

Administrative practice and procedure, Flood insurance, Reporting and recordkeeping requirements.

■ Accordingly, 44 CFR part 67 is amended as follows:

PART 67—[AMENDED]

■ 1. The authority citation for part 67 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

§ 67.11 [Amended]

■ 2. The tables published under the authority of § 67.11 are amended as follows:

Flooding source(s)	Location of referenced elevation	* Elevation in feet (NGVD) + Elevation in feet (NAVD) # Depth in feet above ground ^ Elevation in meters (MSL) modified	Communities affected
--------------------	----------------------------------	--	----------------------

RIN 1018-AX27

Endangered and Threatened Wildlife and Plants; Emergency Rule To Establish a Manatee Refuge in Kings Bay, Citrus County, FL

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Emergency rule.

SUMMARY: This emergency rule establishes a manatee refuge in Citrus County, Florida, in the waters of Kings Bay, including its tributaries and connected waters because we, the U.S. Fish and Wildlife Service (Service), have determined that there is substantial evidence that there is imminent danger of a taking of one or more manatees (*Trichechus manatus*) in these waters. This emergency action is effective for 120 days. We will initiate the rulemaking process to establish a permanent manatee refuge in this area, including holding the first of several public meetings, within 10 days of the publication of this rule.

DATES: This action will be effective from November 15, 2010 through March 15, 2011, and the effective date for this action was also issued through a legal notice published in the *Citrus County Chronicle* on November 9, 2010, in accordance with 50 CFR 17.106. The dates for the public meetings are listed under the Public Participation section of this rule.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at North Florida Ecological Services Field Office, U.S. Fish and Wildlife Service, 7915 Baymeadows Way, Suite 200, Jacksonville, Florida 32256. Supplementary documents may be obtained via the Internet at <http://www.regulations.gov> in Docket No. FWS-R4-ES-2010-0079. The addresses

for the public meetings are listed under the Public Participation section of this rule.

FOR FURTHER INFORMATION CONTACT: Jim Valade, Florida Manatee Recovery Lead, (see **ADDRESSES** section), telephone 904/731-3336.

SUPPLEMENTARY INFORMATION:

Background

The Crystal River is a tidal river on the west coast of Florida. Forming the headwaters of Crystal River is Kings Bay, a lake-like waterbody fed by numerous fresh-water springs. The Kings Bay springs constitute one of the most important natural warm-water refuges for manatees. The West Indian manatee (*Trichechus manatus*) is federally listed as an endangered species under the Endangered Species Act of 1973, as amended (ESA) (16 U.S.C. 1531 *et seq.*) and the population is further protected as a depleted stock under the Marine Mammal Protection Act of 1972, as amended (MMPA) (16 U.S.C. 1361 *et seq.*). The West Indian manatee includes two subspecies: The Florida manatee (*Trichechus manatus latirostris*) and the Antillean manatee (*Trichechus manatus manatus*). The Florida manatee's range includes Kings Bay.

Kings Bay is actively used by a growing population of manatees that now numbers in the hundreds of individuals (reaching 565 individuals in 2010) (Kleen 2010, pers. com.). Manatees primarily use the area in Kings Bay as a wintering site, relying on the bay's natural springs and adjacent forage areas for warmth and sustenance. When Gulf of Mexico water temperatures drop to about 68 °F (20 °C), manatees looking for warmer water will begin showing up regularly in Kings Bay around November 15 and tend to stay until about March 31; this is the identified "manatee season" when local manatee sanctuaries are in effect. Occasionally, manatees will appear in the region earlier with the advent of an early winter and may remain in the region longer, following severe or extended winters. When the weather begins to warm around the end of March, manatees generally move away from the springs and Kings Bay, traveling to summer foraging areas along Florida's west coast.

Over the last 30 years (1980–2010), the Service and the State of Florida have created a network of manatee protection areas within the Kings Bay area. During the manatee season, this network includes seven Federal manatee sanctuaries (which are described in our regulations at 50 CFR 17.108(a)(1)–

(a)(7)) and five State manatee protection zones (as described in Chapter 68C–22, "The Florida Manatee Sanctuary Act" (2010)). This network of manatee protection areas is enforced by Service, State, and local law enforcement officers. Extensive outreach and education programs support the protection area network, encouraging the public who engage in manatee viewing activities to avoid harassing manatees.

This network of existing manatee protection areas was designed to prevent the take of manatees caused by waterborne activities, including but not limited to, boating and manatee viewing activities. It was established to allow manatees to continue to gain access to critical warm-water areas and important resting and foraging areas. Take, as defined by section 3(19) of the ESA, means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or to attempt to engage in any such conduct. "Harm" is further defined by regulation at 50 CFR 17.3 to mean an act which actually kills or injures wildlife. "Harass" is also defined by regulation to mean any intentional or negligent act or omission which creates the likelihood of injury to wildlife by annoying it to such an extent as to significantly disrupt normal behavioral patterns, which include, but are not limited to, breeding, feeding, or sheltering (50 CFR 17.3). Take, as defined by section 3(13) of the MMPA, means to harass, hunt, capture, or kill, or attempt to harass, hunt, capture, or kill any marine mammal. Under section 3(18) of the MMPA, harassment is defined to include any act of pursuit, torment, or annoyance, which (i) has the potential to injure a marine mammal or marine mammal stock in the wild; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering. All takings, including takings by harassment, are prohibited.

The Service can minimize take through the designation of manatee protection areas in the form of either a manatee refuge or a manatee sanctuary. Regulations authorizing designation of manatee refuges and sanctuaries in areas where prohibitions or restrictions on certain waterborne activities are needed to prevent the take of manatees are codified in 50 CFR 17 subpart J. A manatee refuge is defined as an area in which the Director has determined that: (1) Certain waterborne activities will take one or more manatees; or (2) certain waterborne activities must be restricted
