

hours needed for the additional, substantial revisions range from 4 hours for part 121 operators, to 2 hours for part 135 operators. The FAA expects 65 part 121 operators and 624 part 135 operators to provide substantial revisions. Time averages the same of 0.08 hours per employee for recordkeeping for part 121 and part 135 operators. It is estimated that part 145 operators will spend 1 hour for notification. The FAA continues to assume these time burdens are reasonable estimates. Additionally, the type of update can vary. Operators may make minor revisions to the manual, or they may choose to make more significant changes reflecting a larger change in their operations.

Estimated Total Annual Burden:

29,965.58 hours for part 121 operators, 12,505.22 hours for part 135 operators, and 5,974 hours for part 145 operators.

The amount of time per response is expected to vary. For example, new responses take significantly longer than revisions. Furthermore, operators with will-carry hazardous materials operations are anticipated to have longer responses than will-not carry hazardous materials operations. Part 145 repair stations will require less time to develop a certification statement than operators require to develop a manual. Due to the pandemic, the data collection during this time reflects new normal operations.
