Nature and Extent of Confidentiality: There is no need for confidentiality since this is a third party disclosure and labeling requirement.

Needs and Uses: The Commission will submit this revision to the Office of Management and Budget (OMB) after this comment period in order to obtain the full three year clearance from them. The Commission is requesting a revision of this collection which eliminates the early clearing requirement burden as it will be unnecessary after June 12, 2010 while keeping the disclosure and labeling requirements that would allow the Commission to clear the 700 MHz band of wireless microphones and provide them a home in the core TV spectrum, where many wireless microphones are already operating. Therefore, the Commission is reducing the total annual burden for this collection by 1,049 hours (program change).

The point-of-sale disclosure requirement is necessary for a successful transition of wireless microphones out of the 700 MHz band. The Commission anticipates that many wireless microphone users currently operating in the 700 MHz band will have to purchase or lease new equipment capable of operating in the core TV spectrum. The point-of-sale disclosure requirement will help these consumers make an educated decision as they obtain new microphones, and it will help them operate in the core TV spectrum without causing interference to other services in the spectrum. Further, a label on 700 MHz band

wireless microphones bound for export will help to ensure that these wireless microphones do not continue to be made available for use in the United States, in contravention of our efforts to remove them from the 700 MHz band.

Federal Communications Commission.
