Columbia Gulf Transmission Company and Southern Natural Gas Company; Notice of Intent to Prepare an Environmental Assessment for the Proposed East Cameron Block 23A Field Line Abandonment Project and Request for Comments on Environmental Issues

December 1, 2010.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the East Cameron Block 23A Field Line Abandonment Project involving abandonment of facilities by Columbia Gulf Transmission Company (Columbia Gulf) and Southern Natural Gas Company (Southern) in Cameron Parish, Louisiana. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. Your input will help the Commission staff determine what issues need to be evaluated in the EA. Please note that the scoping period will close on January 3, 2011.

This notice is being sent to the Commission’s current environmental mailing list for this project. State and local government representatives are asked to notify their constituents of this planned project and encourage them to comment on their areas of concern.

A fact sheet prepared by the FERC entitled “An Interstate Natural Gas Facility On My Land? What Do I Need To Know?” was attached to the project notice Columbia Gulf provided to landowners. This fact sheet addresses a number of typically-asked questions, including how to participate in the Commission’s proceedings. It is also available for viewing on the FERC Web site (<http://www.ferc.gov>).
