j. On April 13, 2010, Commission staff requested additional information from TideWorks, LLC including project operation, water velocity, and finfish data in the area of the proposed project. On May 5, 2010, TideWorks, LLC filed a revised final exemption application in response to the requested information.

Based on a review of the exemption application, additional environmental information subsequently filed by TideWorks, LLC, resource agency consultation letters and comments filed to date, Commission staff intend to prepare a single environmental assessment (EA). The EA will assess the potential effects of project construction and operation on aquatic, terrestrial, threatened and endangered species, recreation, and cultural resources. Because staff believe the issues that need to be addressed in its EA have been adequately identified, with this notice, we are soliciting comments on our intent to waive scoping for the TideWorks Project.

k. *Deadline for filing motions to intervene, protests, and comments*: 60 days from the issuance date of this notice.

*All documents (original and eight copies) should be filed with*: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426.

The Commission's Rules of Practice require all interveners filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

l. This application has been accepted for filing, but is not ready for environmental analysis at this time.

m. *Description of Project*: The proposed TideWorks Project would consist of: (1) A new 10-foot-wide, 20-foot-long steel pontoon float suspending into the river; (2) a new submerged 5 kilowatt single vertical shaft hydrokinetic turbine generating unit with four 4-inch-wide, 5-foot-long blades; (3) a new 3.5-foot-wide, 40-foot-

long walkway ramp connecting the pontoon float to Bareneck Island; (4) a new 100-foot-long, 220-volt transmission line; and (5) appurtenant facilities. The project would have an average annual generation of about 22,000 kilowatt-hours. The project would operate in a run-of-river mode using the river current flood and ebb tidal flows to rotate the hydrokinetic turbine generating unit.

n. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Any protests or motions to intervene must be received on or before the specified deadline date for the particular application.

*All filings must*: (1) Bear in all capital letters the title "PROTEST" or "MOTION TO INTERVENE;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005.
