

Those stock contractors who move their bulls interstate only between Class Free States will realize a cost savings of about \$25 to \$30 per animal per year (*i.e.*, the cost of a brucellosis test and associated veterinary fees). Thus, a stock contractor with 20 bulls will see a savings of about \$500 to \$600 per year in testing expenses.

While stock contractors are not specifically categorized in the Small Business Administration's (SBA) table of small business size standards, they could be considered under either Subsector 112 of that table (Animal Production), which has a small entity threshold of \$750,000, or Subsector 711 (Performing Arts, Spectator Sports and Related Industries), which has a small entity threshold of \$6 million in annual sales. According to the National Agricultural Statistics Service, over 99 percent of all operations raising cattle and calves (\$750,000 threshold) are small entities, while large operations account for less than 1 percent. Therefore, it is likely that most, if not all, stock contractors would be considered small entities under SBA size standards.

Given that the savings per animal in foregone testing costs (\$25 to \$30) can be expected to make up only a small percentage of the total expenses associated with maintaining a rodeo bull (*e.g.*, feed and routine veterinary care), the economic impact of this rule is expected to be small.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.
