

requirements pertaining to the mitigation, monitoring and reporting of such taking are set forth.

NMFS has defined “negligible impact” in 50 CFR 216.103 as:

an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

With respect to military readiness activities, the MMPA defines “harassment” as:

(i) any act that injures or has the significant potential to injure a marine mammal or marine mammal stock in the wild [Level A Harassment]; or (ii) any act that disturbs or is likely to disturb a marine mammal or marine mammal stock in the wild by causing disruption of natural behavioral patterns, including, but not limited to, migration, surfacing, nursing, breeding, feeding, or sheltering, to a point where such behavioral patterns are abandoned or significantly altered [Level B Harassment].

Summary of Request

On March 21, 2008, NMFS received an application from the USAF requesting authorization for the take of four species of marine mammals incidental to space vehicle and test flight activities from VAFB, which would impact pinnipeds on VAFB and the Northern Channel Islands, over the course of 5 years. These training activities are classified as military readiness activities. Marine mammals may be exposed to continuous noise due mostly to combustion effects of aircraft and launch vehicles and impulsive noise due to sonic boom effects. The USAF requests authorization to take four pinniped species by Level B Harassment.

Specified Activities

There are currently six active space launch vehicle facilities at VAFB used to launch satellites into polar orbit. These facilities support the launch programs for space vehicles, including the Atlas V, Delta IV, Falcon, Minotaur, and Taurus. There are also a variety of small missiles launched from North VAFB, including the Minuteman III and several types of interceptor and target vehicles for the Missile Defense Agency program. The VAFB runway, located on north VAFB, supports various aircraft operations. A full description of the activities to be conducted by the USAF at VAFB, including descriptions of the different space vehicles and missiles, are described in the USAF’s application.

Information Solicited

Interested persons may submit information, suggestions, and comments concerning the USAF’s request (see **ADDRESSES**). All information,

suggestions, and comments related to the USAF’s request and NMFS’ potential development and implementation of regulations governing the incidental taking of marine mammals by the USAF on and around VAFB will be considered by NMFS in developing, if appropriate, regulations governing the issuance of letters of authorization.
