¹ The number of respondents for the Mother Supplement (1,730) is less than the number of responses (2,200) because mothers are asked to provide separate responses for each of the biological children with whom they reside. The total number of responses for the Mother Supplement (2,200) is more than the number for the Child Supplement (2,050) because the number of children completing the Child Supplement is lower. The total number of 14,110 respondents across all the survey instruments is a mutually exclusive count that does not include: (1) The 200 re-interview respondents, who were previously counted among the 7,800 main survey respondents and (2) the 1,310 Child SAQ respondents, who were previously counted among the 2,050 Child Supplement respondents.

Total Annualized capital/startup costs: \$0.

Total Annual Costs (operating/maintaining systems or purchasing services): \$0.

Description: The information obtained in this survey will be used by the Department of Labor, other government agencies, academic researchers, the

news media, and the general public to understand the employment experiences and life-cycle transitions of men and women born in the years 1957
