Discussion:

On October 13, 2010 (75 FR 62695), the NRC published a proposed rule that would amend its regulations in 10 CFR Part 73 to enhance the security requirements that apply to the transportation of spent nuclear fuel. The public comment period for the proposed rule has been extended through April 11, 2011. In conjunction with the proposed rule, the NRC has revised NUREG-0561, “Physical Protection of Shipments of Irradiated Reactor Fuel.” This document provides guidance on implementing the provisions of proposed 10 CFR Part 73.37, “Requirements for Physical Protection of Byproduct Material” and proposed 10 CFR 73.38, “Personnel Access Authorization Requirements for Irradiated Reactor Fuel in Transit.”

On November 3, 2010 (75 FR 67636), the NRC published for public comment the proposed revision to NUREG-0561. The NRC has determined that additional time is needed for public review of the potential impacts of the proposed requirements. In order to allow the public sufficient time to review and comment on the proposed rule, the NRC

has decided to extend the comment period until May 11, 2011.

Dated at Rockville, Maryland, this 20th day of January 2011.

For the Nuclear Regulatory Commission.

Chief, Fuel Cycle and Transportation Security Branch, Division of Security Policy, Office of Nuclear Security and Incident Response.

SUPPLEMENTARY INFORMATION:

- I. Background on the Maryland Program
- II. Description of the Amendment
- III. Public Comment Procedures
- IV. Procedural Determinations

I. Background on the Maryland Program

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its program includes, among other things, "a State law which provides for the regulation of surface coal mining and reclamation

operations in accordance with the requirements of this Act * * * and rules and regulations consistent with regulations issued by the Secretary pursuant to this Act." See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior approved the Maryland program on February 18, 1982. You can find background information on the Maryland program, including the Secretary's findings, the disposition of comments, and conditions of approval of the Maryland program in the February 18, 1982, **Federal Register** (47 FR 7214-7217). You can also find later actions concerning the Maryland program and program amendments at 30 CFR 920.12, 920.15, 920.16.

II. Description of the Amendment

By letter dated June 24, 2010, Maryland sent us an amendment to its program, Administrative Record Number MD-588.00, under SMCRA (30 U.S.C. 1201 *et seq.*). Maryland added regulations to regulate coal combustion byproducts and to establish requirements pertaining to the generation, storage, handling, processing, disposal, recycling, beneficial use, or other use of coal combustion byproducts (CCB) within the State. In total, these regulations pertain to all CCB activities in the State, not just surface coal mining and reclamation operations. However, a section of the added regulations specifically pertains to surface coal mining and reclamation operations and are proposed to be part of Maryland's Federally approved state program. The regulation specific to surface coal mining and reclamation operations has been added as a new regulation, Regulation .08 under COMAR 26.20.24, Special Performance Standards.

Specifically, Maryland's Regulation .08 Utilization of Coal Combustion Byproducts will include paragraphs A-H on the Purpose and Scope, Conditions for Utilization, and Testing and Monitoring. Additionally, Maryland is adding a Coal Combustion Byproducts Utilization Request requirement that will require a solids analysis of the CCBs and a Toxicity Characteristics Leaching Procedure (TCLP) leachate analysis of the CCBs. Maryland may also impose additional controls or conditions on the use of CCBs as it sees fit for the protection of human health and the environment.
