

calculation of burden hours. The previous ICR included technical and managerial labor hours only in its burden calculations. To be consistent with the estimation methodology used in other ICRs, we have revised the calculations to include clerical labor burden, and have assumed it to be equal to 10 percent of technical labor hours. These revisions resulted in an increase in the respondent labor burden and associated cost.

There is an increase in the total O&M costs for industry respondents. This increase is due to a mathematical error identified in the previous ICR and is not due to changes in the individual O&M costs or the number of corresponding respondents.

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Submission for OMB Review; Comment Request

AGENCY: Federal Trade Commission.

ACTION: Notice and request for comment.

SUMMARY: The Federal Trade Commission (FTC or Commission) plans to conduct an online survey of parents and (with parental permission) their children from the ages of 8-16 years old who watch movies, listen to music, and/or play game applications (apps) on smartphones, Internet-accessible handheld devices, or tablet computers (collectively app-capable mobile devices) that run either the Apple's iOS or Google's Android operating system. This is the second of two notices required under the Paperwork Reduction Act (PRA), and the Commission seeks additional public comments and requests Office of Management and Budget (OMB) review of, and clearance for, the proposed collection of information.

DATES: Comments must be received by April 11, 2013.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the proposed information requirements should be addressed to Keith Fentonmiller, (202) 326-2775, Attorney, Federal Trade Commission, Bureau of Consumer Protection, Division of Advertising Practices, 600 Pennsylvania Ave. NW., Washington, DC 20580.

SUPPLEMENTARY INFORMATION:

Title: Online survey of parents and children about movies, music, and games on app-capable mobile devices.

OMB Information Collection Request Reference Number: 201302-3084-002.

Type of Information Request: New collection.

Type of Review: Regular.

Abstract: Although children (like consumers generally) increasingly are purchasing or playing movies, music, and games on app-capable mobile devices, no commercially available data quantify children's consumption of mobile content that is rated or labeled as potentially inappropriate for them; assess whether and to what extent the various content rating systems impact their ability to purchase or play such content; or measure the content restrictions imposed by parents, including through technology-based parental control mechanisms.

Accordingly, the Commission proposes to conduct a survey of parents and (with parental permission) their children from the ages of 8-16 years old who use the most common app-capable mobile devices—those that run either Apple's iOS or Google's Android platform. The staff anticipates conducting a voluntary online survey of 900 adult respondents and 900 children drawn from a nationally representative pool. The Commission expects that the survey results will help inform its policy recommendations on the marketing of violent entertainment to children.

On September 24, 2012, the Commission sought comment on the information collection requirements for the proposed consumer research. 77 FR 58834. No comments were received. Staff, however, did have a telephone discussion about the proposed survey with representatives from the Entertainment Software Rating Board (ESRB). The ESRB expressed concern that the Commission was planning to

survey only children, in contrast to prior surveys, which asked questions of both children and their parents. After further consideration, the Commission has decided to expand the online survey to include the parents of children who watch movies, listen to music, and/or play game apps on mobile devices. As required by OMB regulations, 5 CFR part 1320, the FTC is providing this second opportunity for public comment.

This online survey will build upon the body of consumer research that the Commission has conducted in the media violence area since 2000, which includes seven undercover shops by children of music, movie, and video game retailers and movie theaters; two telephone surveys of parents and children about their awareness and use of the entertainment rating and labeling systems;¹ a mall intercept study of parents on the adequacy of rating disclosures on movie DVD cases; and a telephone survey of parents on the marketing of unrated DVDs.² Although a survey of only children about their consumption of violent entertainment on mobile devices would be informative, past research has been especially instructive when the Commission has been able to compare the responses of parents and their children about parental involvement in the selection and purchase of violent movies, music, and games; the extent to which parents restrict their children's access to violent content; and awareness and use of the rating and labeling systems for such content. This research has uncovered significant differences between what parents think they are doing to regulate their children's consumption of violent content and their children's reported experiences. These areas of parent-child disconnection have informed the Commission's recommendations for the entertainment industry and guided its consumer education efforts. For these same reasons, the Commission now intends to survey parents about their children's access to violent content on
