These consultations will be conducted in accordance with Executive Order 13175, *Consultation and Coordination with Indian Tribal Governments* (65 FR 67429), the President's memorandum of April 29, 1994, *Government-to-Government Relations with Native American Tribal Governments* (59 FR 22961), DOE-specific guidance on tribal interactions, and applicable natural and cultural resources laws and regulations.

The public is encouraged to provide information and comments on issues it believes should be addressed in the EIS. Comments on the scope of the EIS will be addressed by Western and the Forest Service. Comments will be accepted at any time during the EIS process. Comments received outside of the scoping period may be addressed in the draft EIS if practicable, otherwise they will be addressed later in the process, such as in the final EIS.

Western has set up a Web site at <http://www.wapa.gov/transmission/Western-FS-EIS.htm> to facilitate the distribution of project information including meeting notices, project documents, schedules and other information. The public will be able to obtain documents for review from this Web site or request digital or hardcopies of documents for review.

Western anticipates that the EIS process will take about 15 months, and will include public scoping meetings; consultation and coordination with appropriate Federal, State, county, and local agencies and tribes; distribution of and public review and comment on the Draft EIS; a formal public hearing on the Draft EIS; distribution of a Final EIS; and publication of the Record of Decision in the **Federal Register**.

What Information is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Affected entities: Entities potentially affected by this action are states and regional offices. They are potentially affected by the attainment demonstration, Reasonable Further Progress (RFP) State Implementation Plan (SIP) submission, and Reasonable Available Control Technology (RACT) SIP submission for the non-attainment areas. Local, state, and federal agencies are part of the North American Industrial Classification System Code number 924110. There are other entities that may be indirectly affected, as they may comment on the draft submissions before they are forwarded to EPA's regional offices. These include potentially regulated entities, representatives of special interest groups, and individuals.

Title: 8-Hour Ozone National Ambient Air Quality Standard Implementation Rule.

ICR numbers: EPA ICR No. 2236.03, OMB Control No. 2060-0594.

ICR status: This ICR is currently scheduled to expire on July 31, 2010. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9. They are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The PRA requires the information found in this ICR number 2236.02 to assess the burden (in hours and dollars) of the 8-hour Ozone National Ambient Air Quality Standard Implementation (NAAQS) Rule as well as the periodic reporting and record keeping necessary to maintain the rule. The rule was proposed on June 2, 2003, (68 FR 32802) and promulgated in two Phases: Phase 1 published on April 30, 2004, (69 FR 23951) and Phase 2 published on November 29, 2005 (70 FR 71612). The preamble to the proposed and final regulations addressed the administrative burden in general terms. The preamble to the final Phase 2 rule stated that an ICR would be prepared (70 FR 71692). The rule includes requirements that involve collecting information from states with areas that have been designated nonattainment for the 8-hour ozone NAAQS. The time

period covered in this ICR is a 3 year period from August 1, 2010, through July 31, 2013. These information collection milestones include state submission of an attainment demonstration SIP, a RFP SIP submission, and a RACT SIP. However, not all of the milestones and associated burden and administrative costs estimates apply to every designated nonattainment area. Areas with cleaner air quality have fewer requirements.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 317 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Respondents/Affected Entities: State and local governments.

Estimated total number of respondents: 39.

Frequency of response: Annual.

Estimated total annual burden hours: 6,667 hours.

Estimated total annual costs: \$434,000. This includes an estimated burden cost of \$0 for capital investment or maintenance and operational costs.

Are There Changes in the Estimates From the Last Approval?

There is a decrease of 278,666 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects EPA's information that the number of non-attainment areas has decreased as areas have come into compliance with the standards and that the burden associated with the remaining non-attainment areas is less because of the work they have done previously to comply with the standards.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: April 1, 2010.

Director, Office of Air Quality Planning and Standards.
